Q1. 10 Y/O female, blurred vision

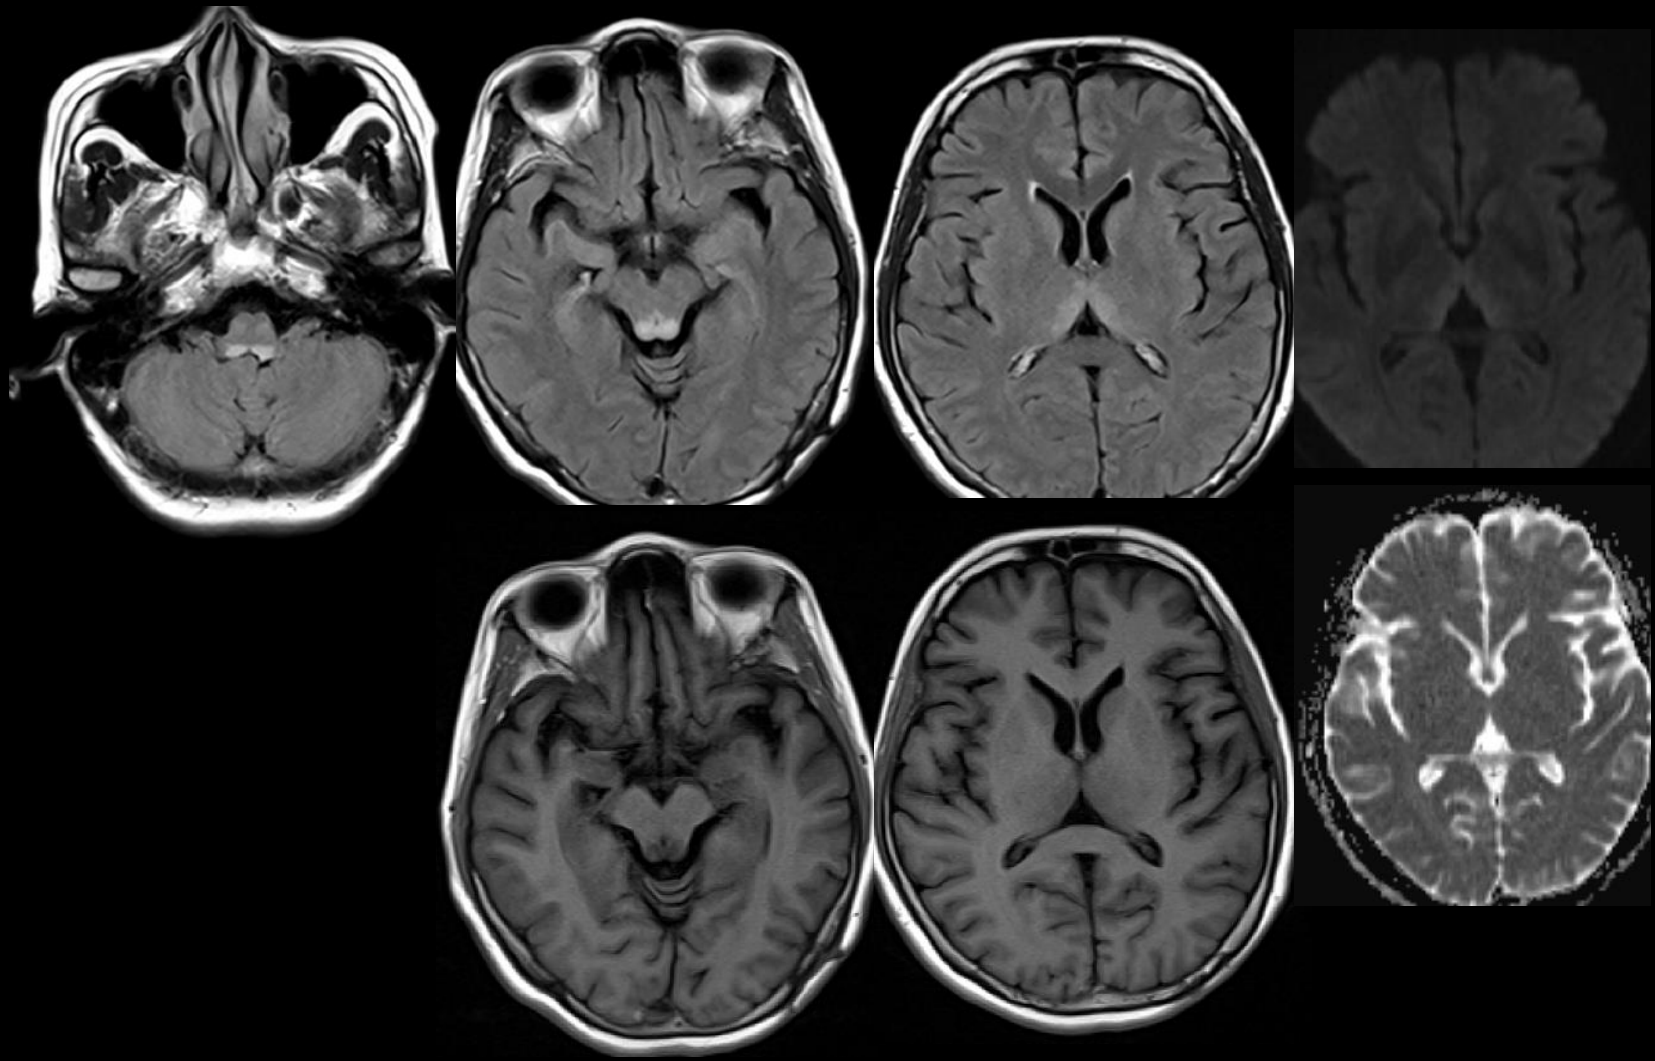

Pontine glioma

Deep vein thrombosis

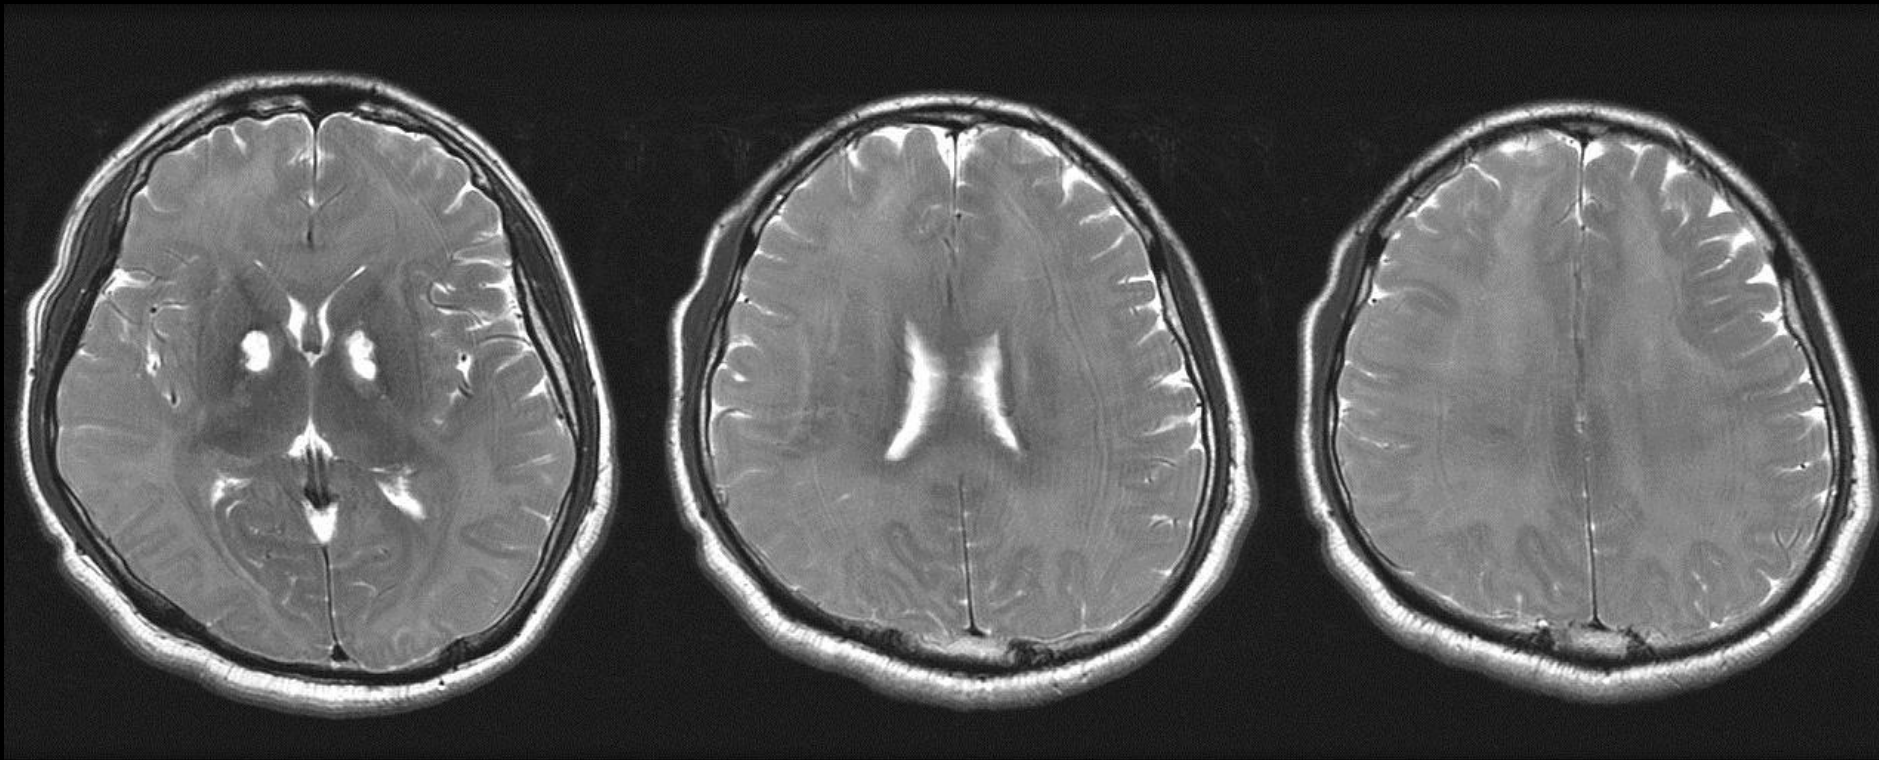

Q3.

57 y/o female, acute pancreatitis s/p surgery. Nystagmus is noted. Abnormal EEG is noted

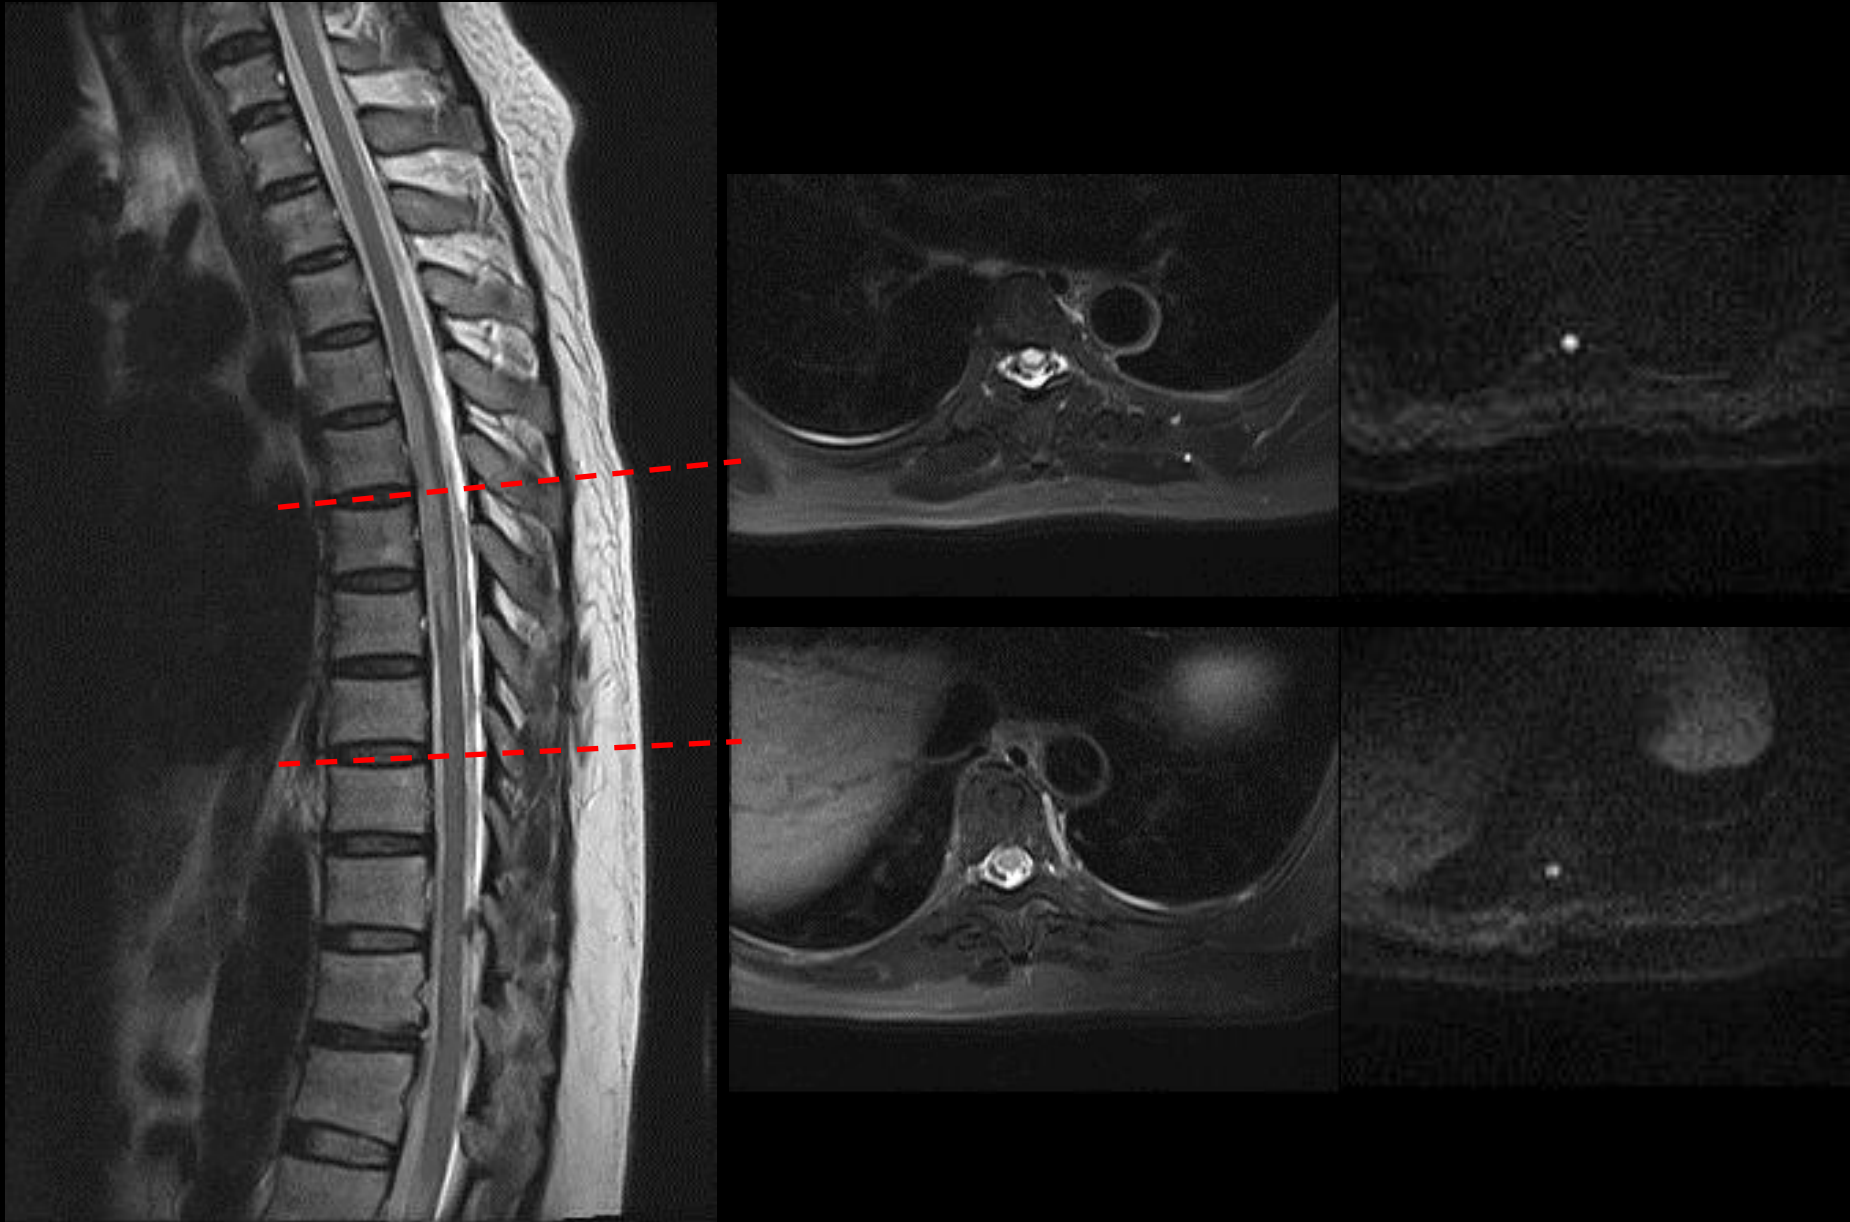

Wernicke's encephalopathy

26y/o male bizzare behavior for days

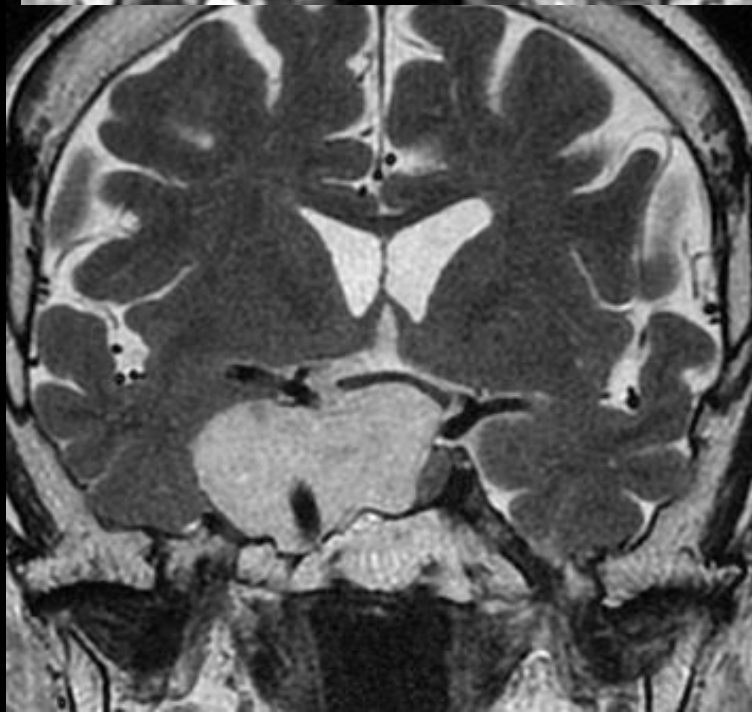

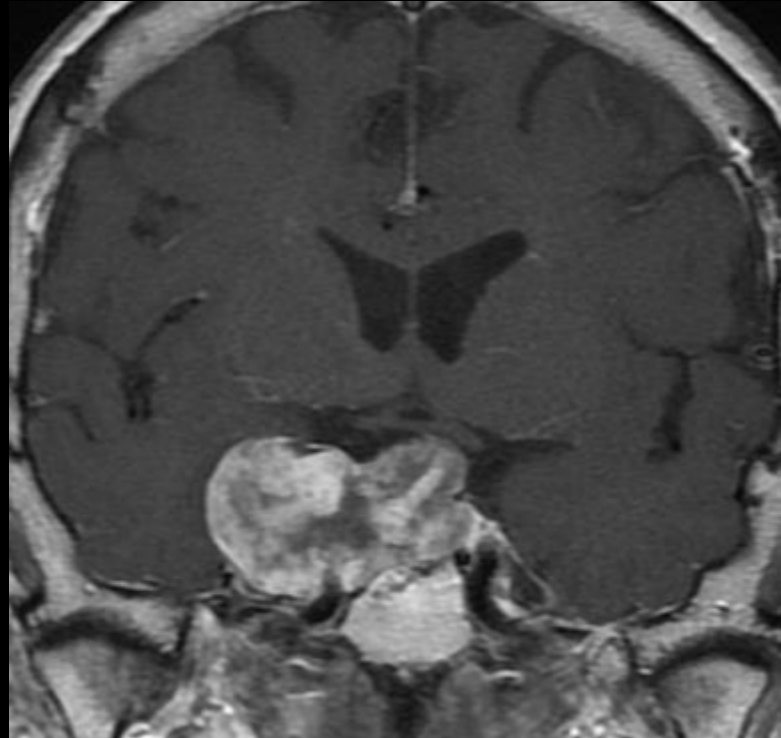

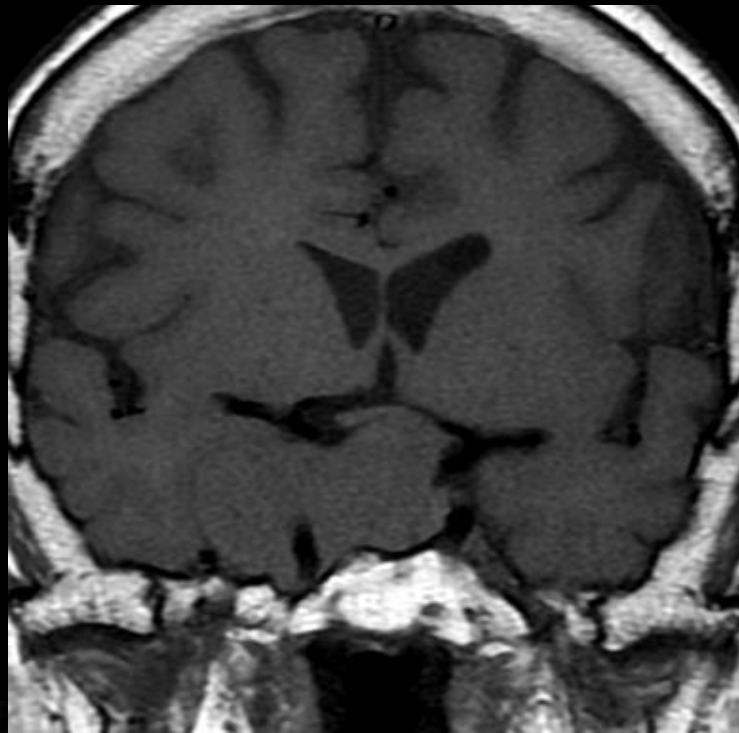

CO intoxication with delayed
demyelination

58y/o female acute onset of bilateral lower limbs weakness

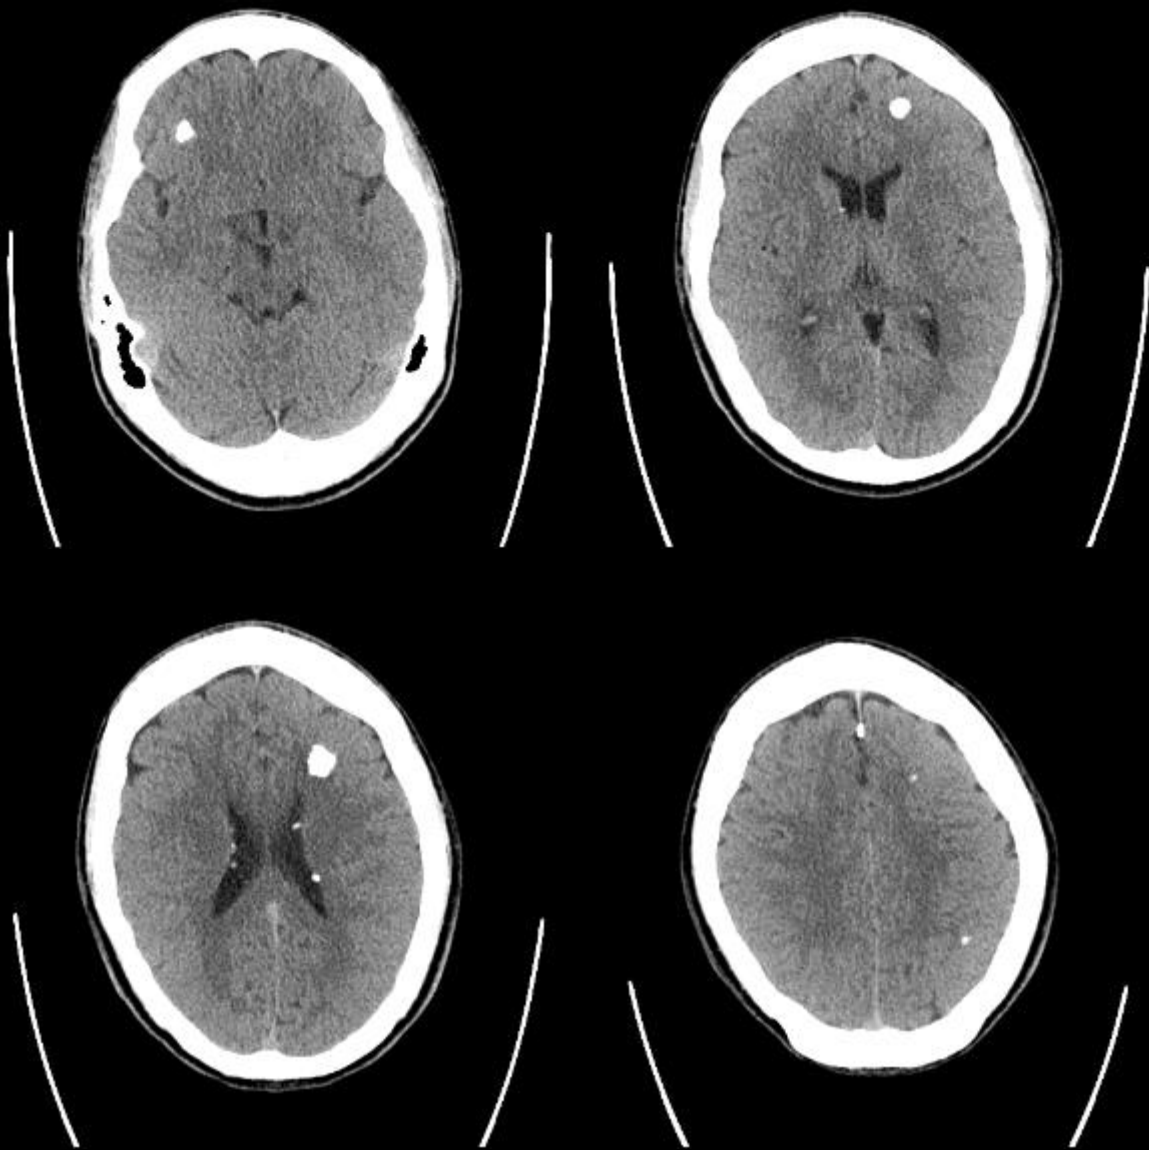

T-cord infarct

Q6.

cavernous hemangioma

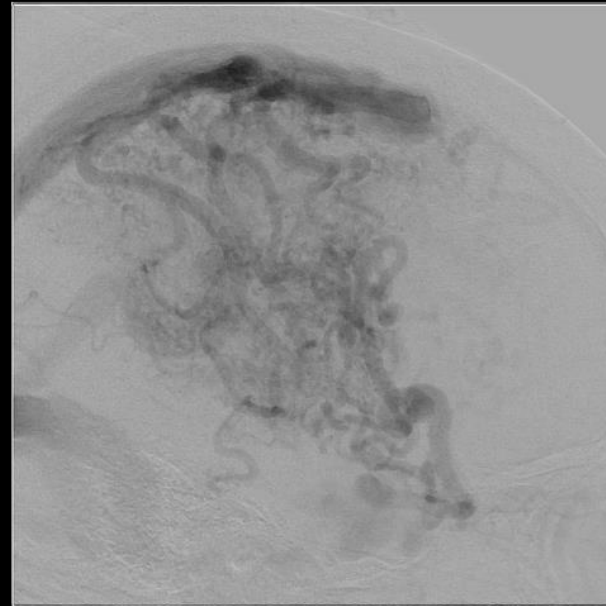

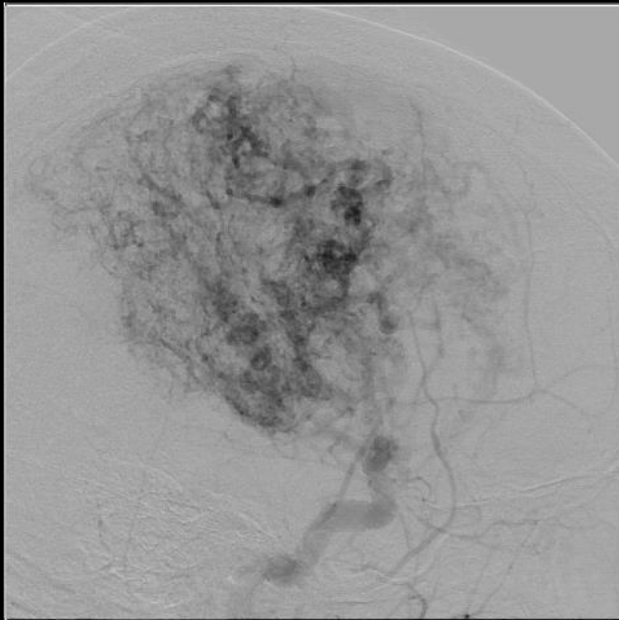

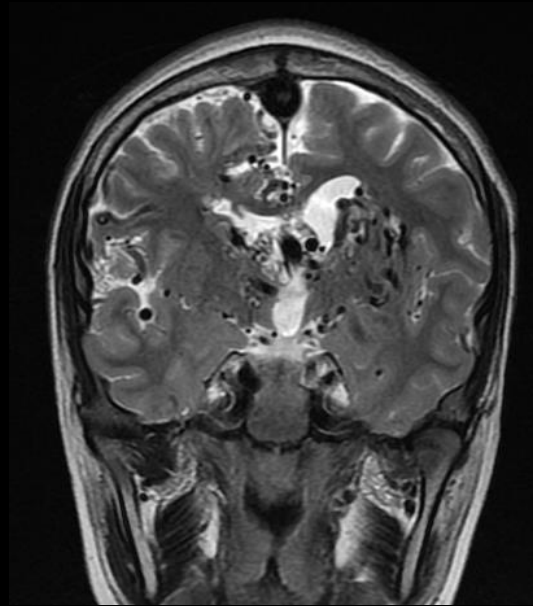

32 y/o male Epilepsy since 10 y/o

Tuberous sclerosis

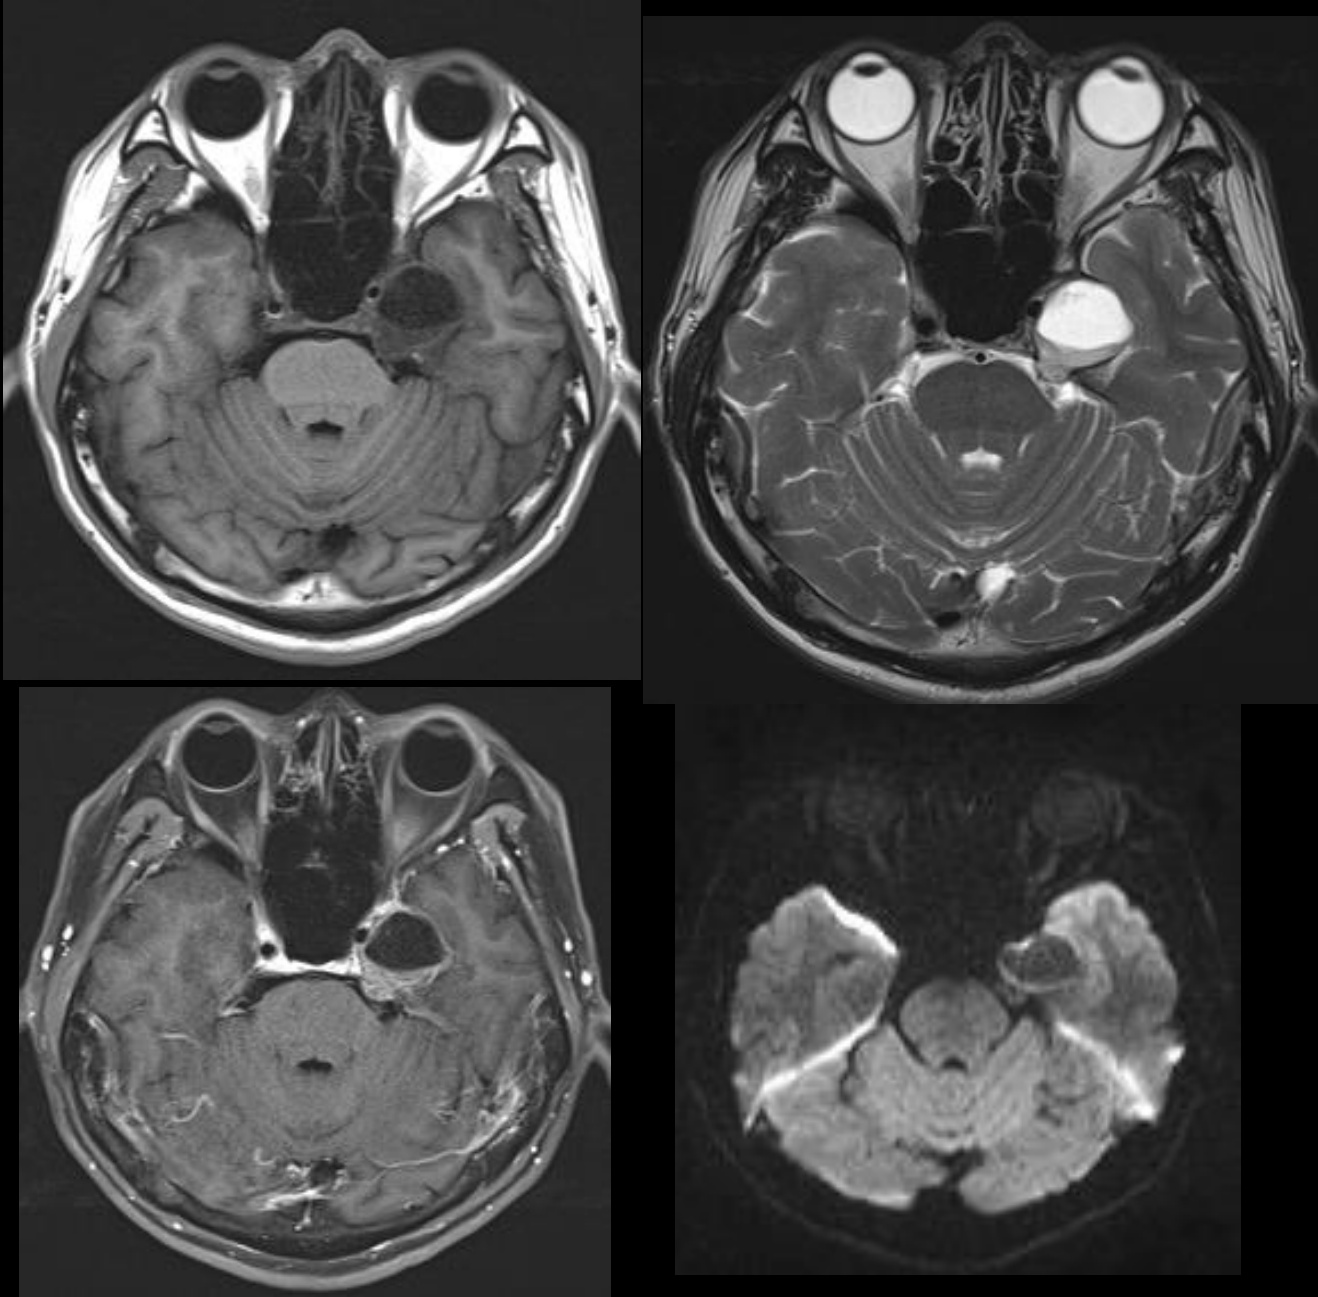

Q8.

11/female Left limb weakness for 1 hour, consciousness drowsy

cerebral proliferative angiopathy

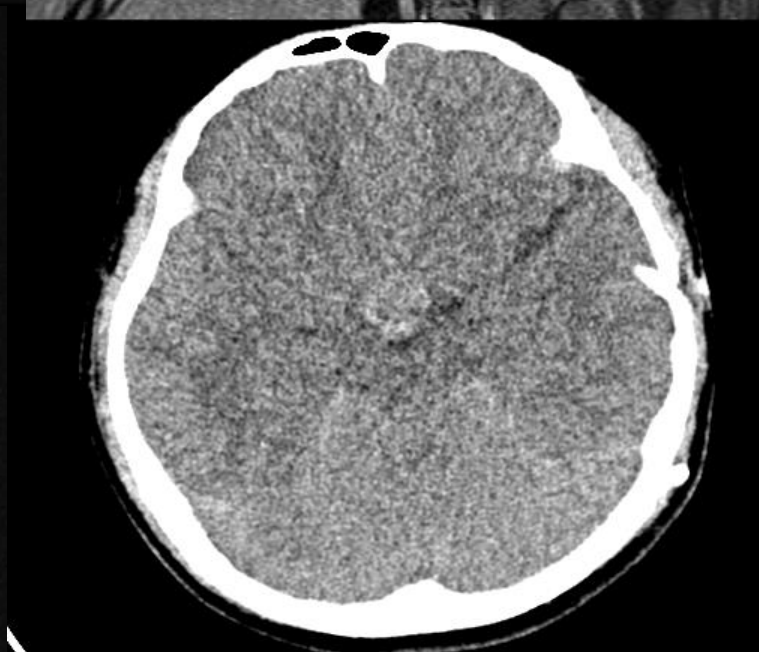

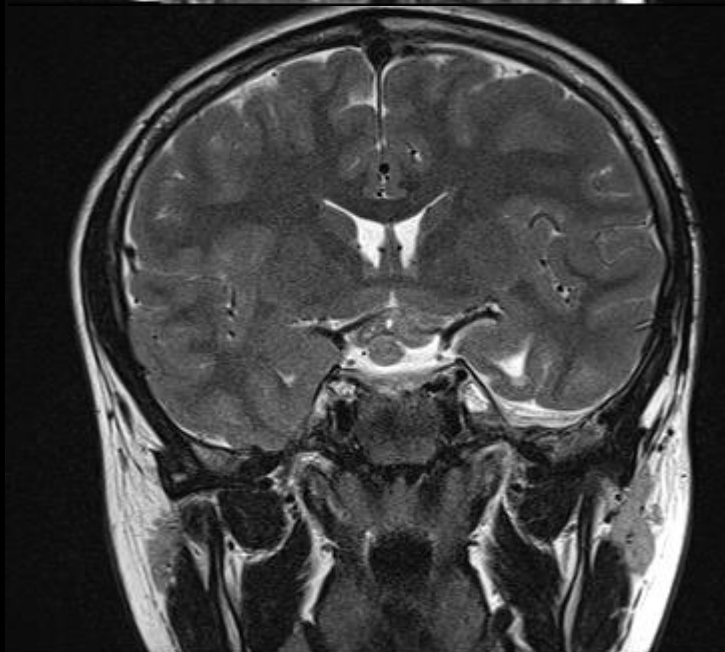

41Y/O male, left facial numbness

Nerve sheath tumor

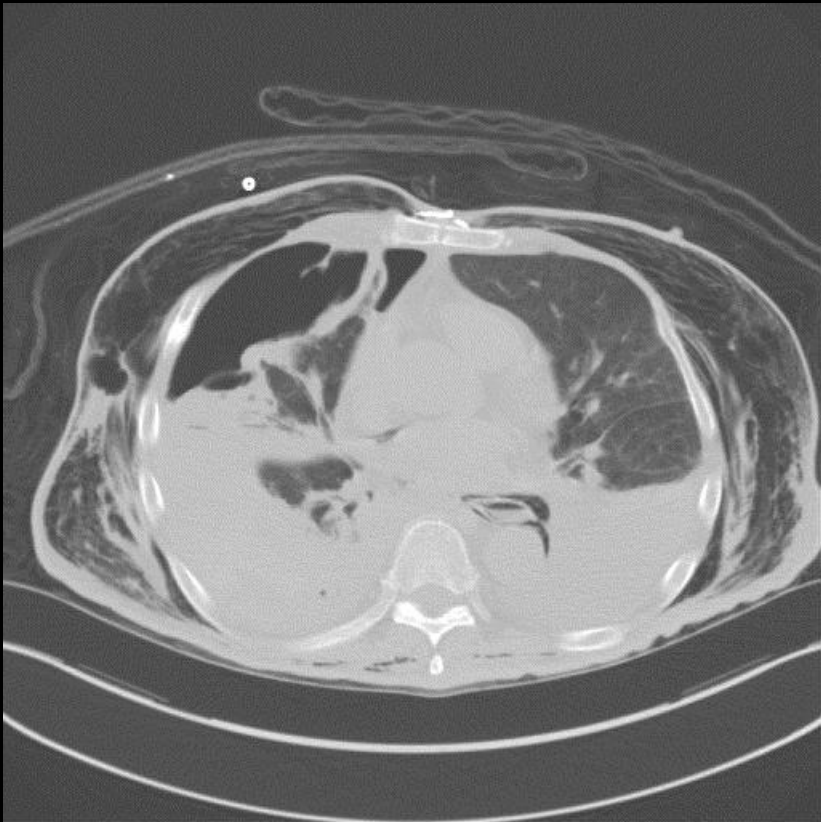

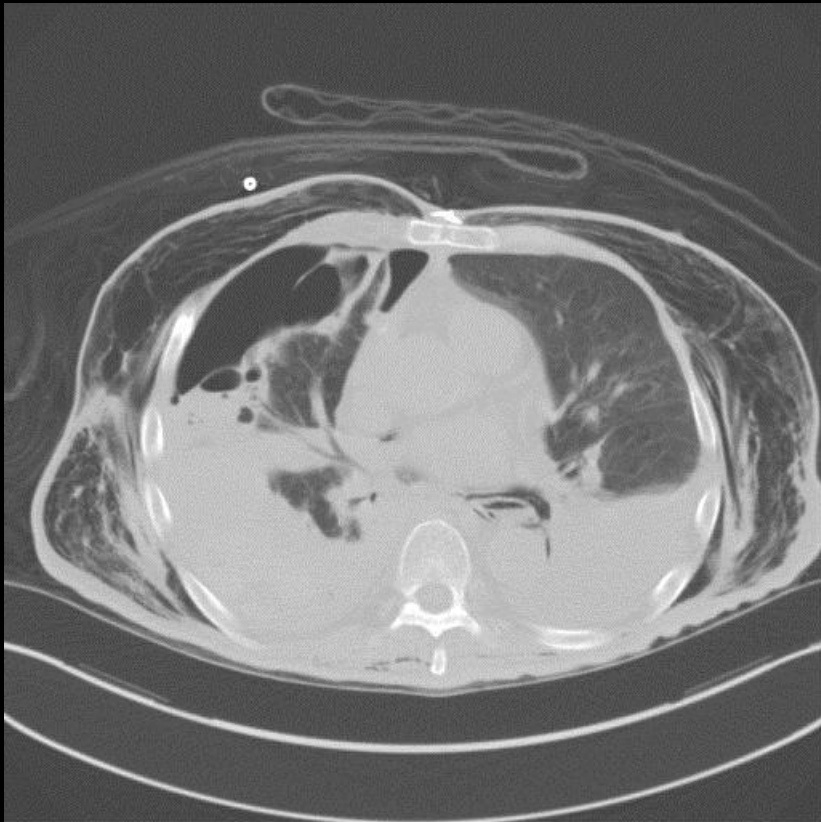

Q10.

9Y/O male, precocious puberty

Germ cell tumor

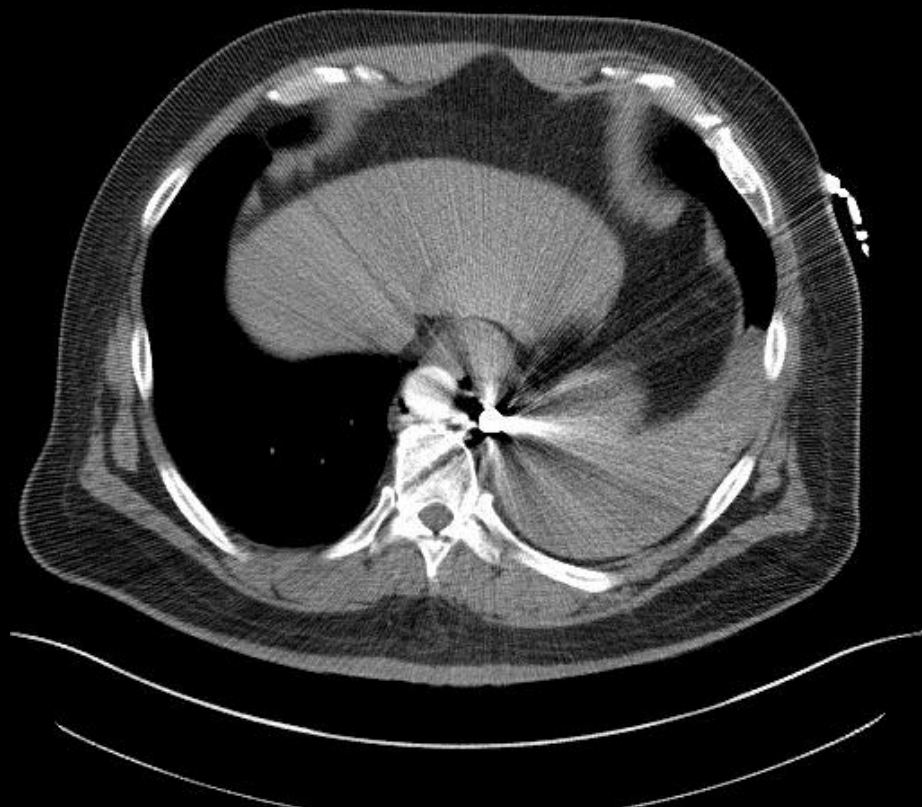

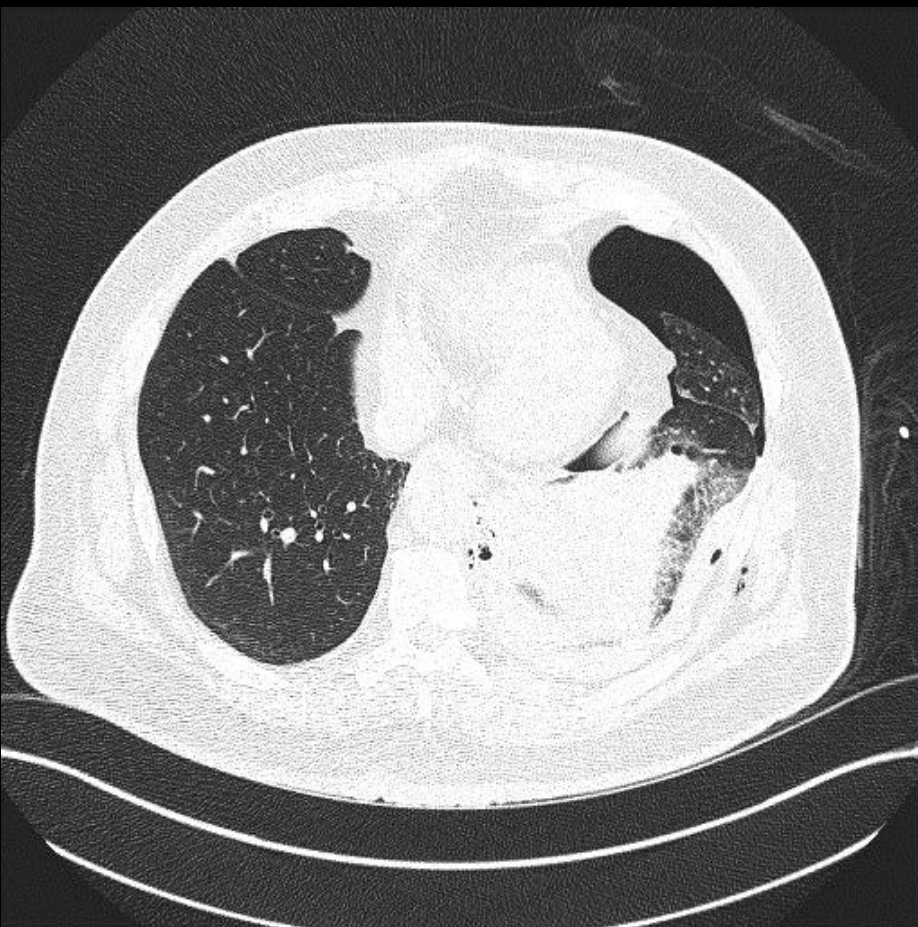

69 y/o male. SOB

RML lung abscess with
bronchopleural fistula,
pneumothorax and subcutaneous
emphysema

Q12.

57y/o male

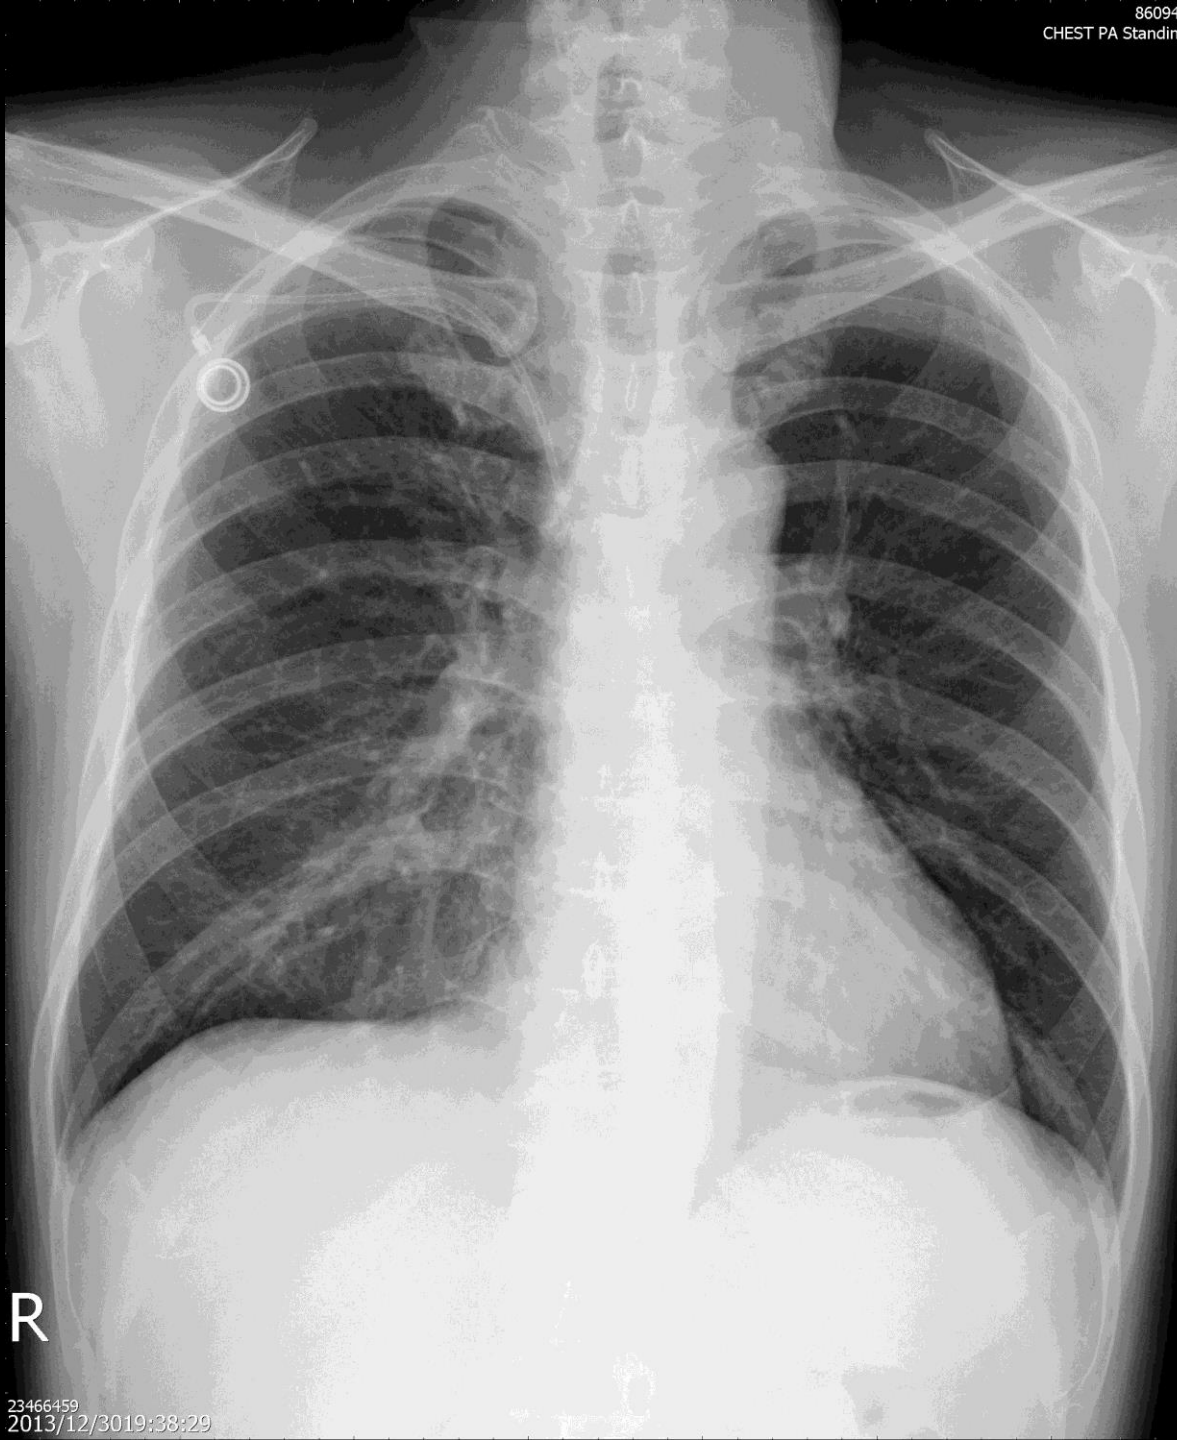

gun shot injury

Q13.

860942
CHEST PA Standing

49/male
SOB head
and neck CA
s/p OP

R

trachea stenosis

Q14.

39/ female SOB

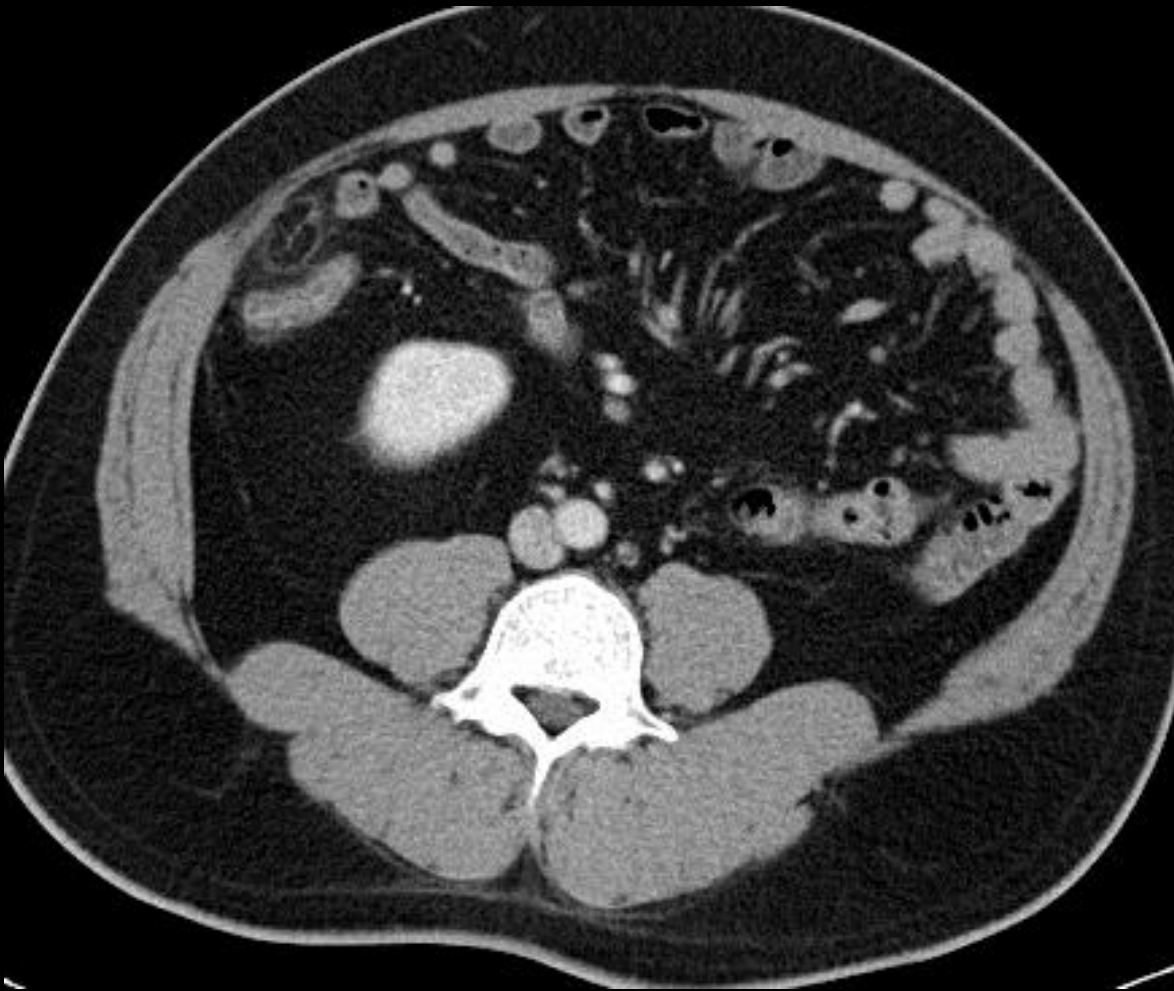

Lymphangiomyomatosis

Q15.

47/Male

Right lower abdominal pain

Epiploic appendagitis

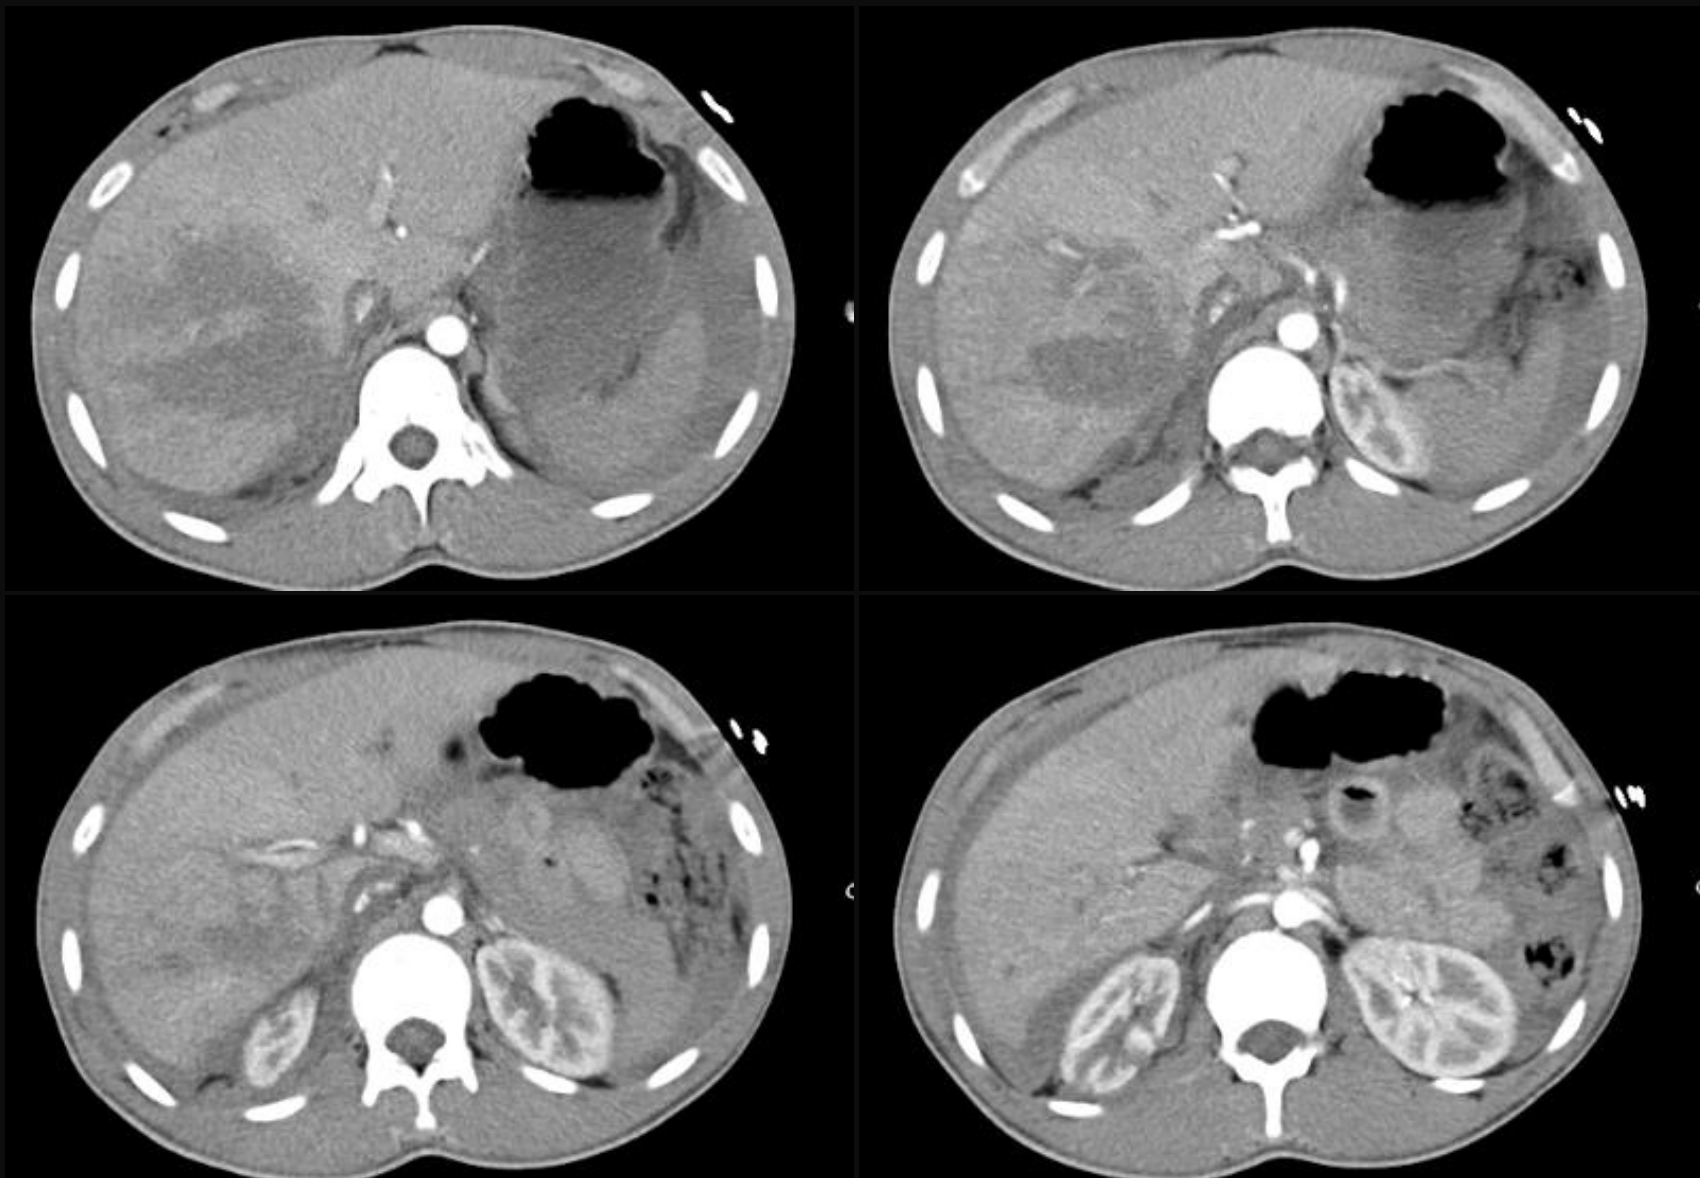

Q16.

66/female
abdominal
fullness.

Gallstone ileus.

18 years old 騎機車撞電線杆

Hypovolemic shock complex

Q18.

75/F Abdominal pain

1. Right obturator hernia with small bowel incarceration.
2. Right sciatic hernia

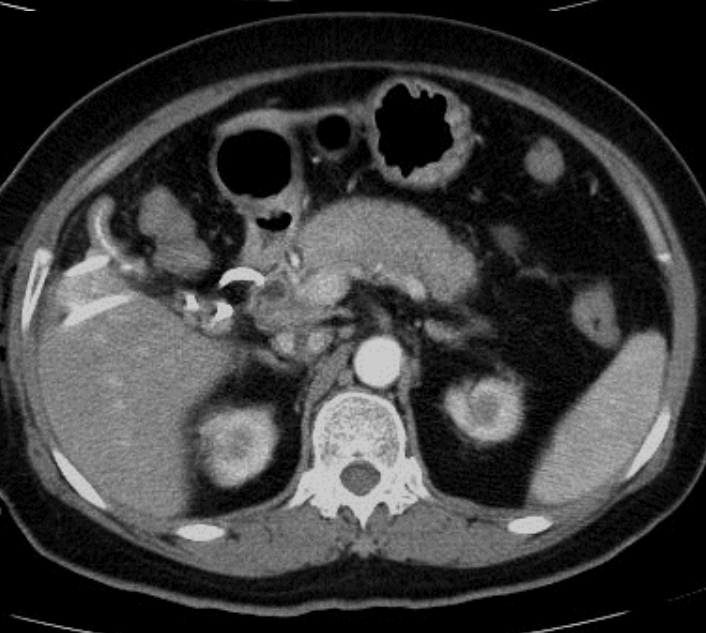

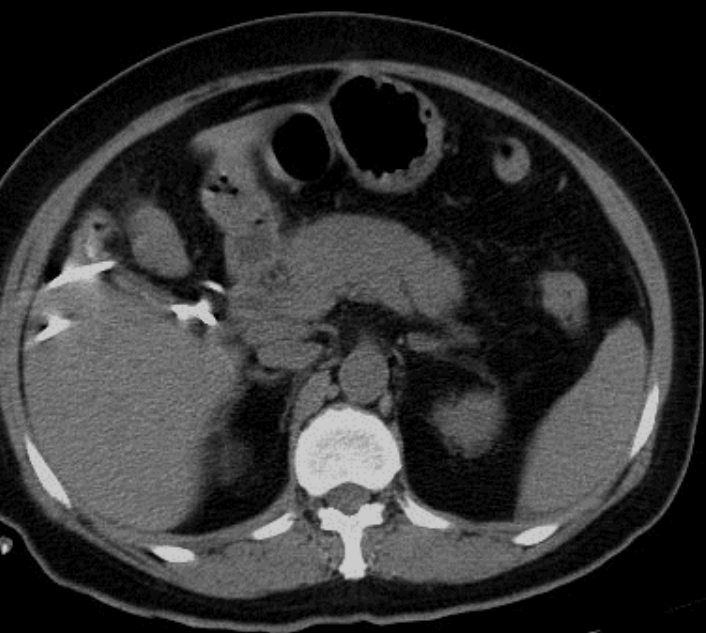

88/male bloody stool

Peutz-Jeghers syndrome with intussusception

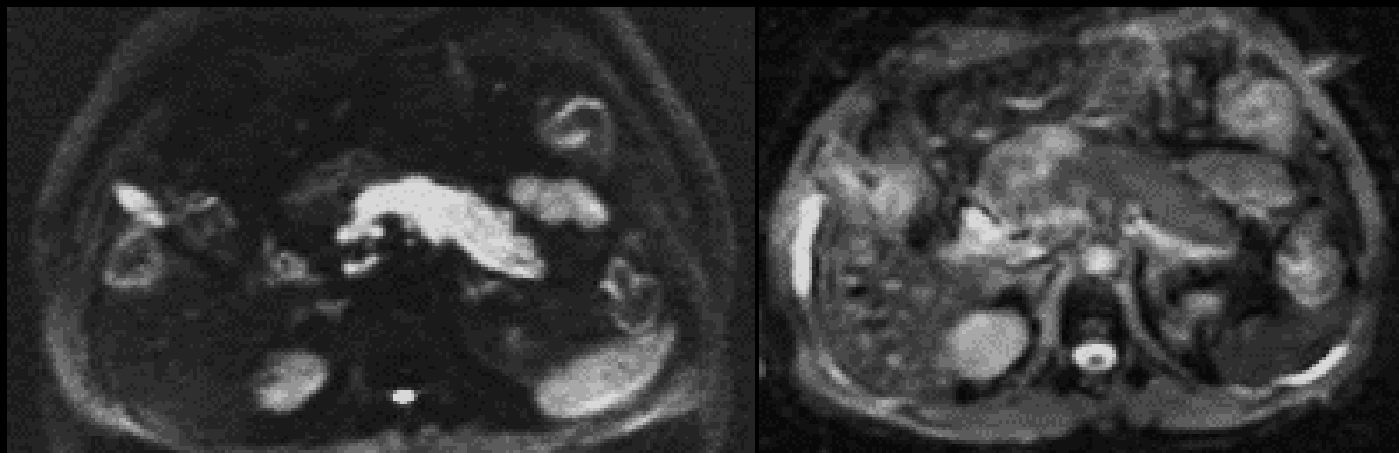

Q20. • 50 y/o male with obstructive jaundice

共2頁 1/2

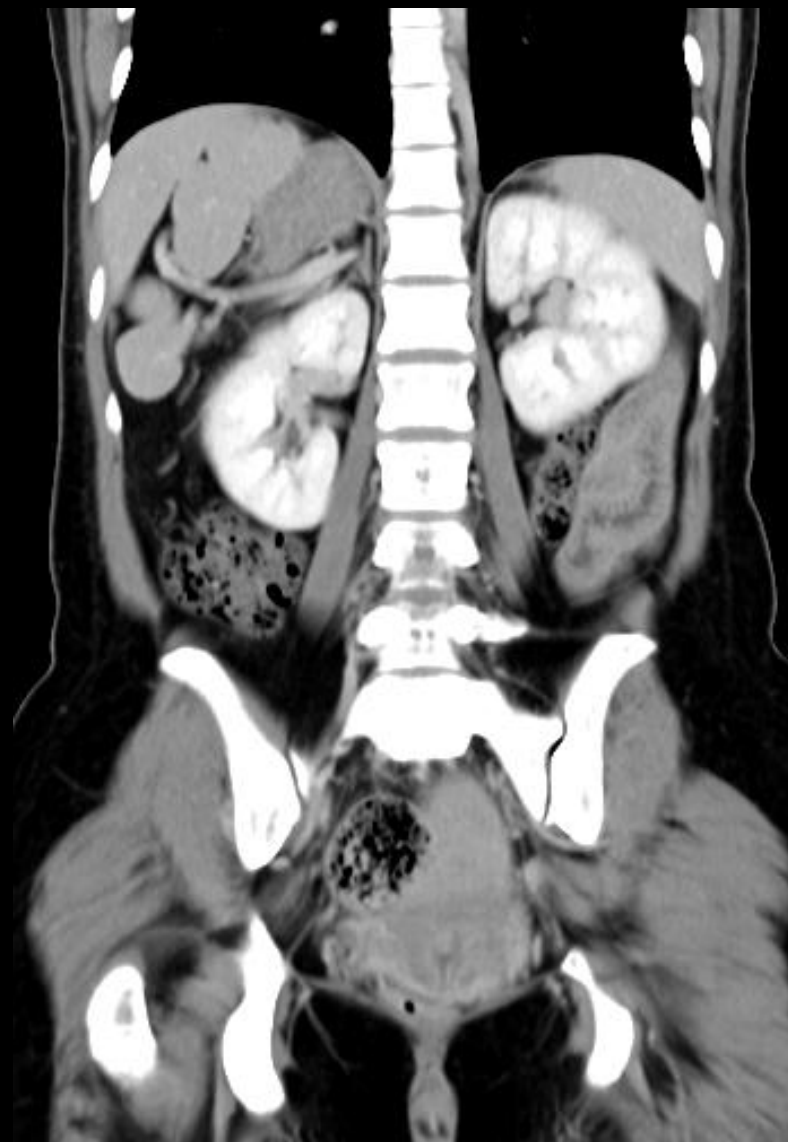

Dynamic contrast-enhanced FS T1W

共2頁 2/2

Diffusion-weighted ($b=1000$) and ADC

Autoimmune pancreatitis
or
IgG4-related disease

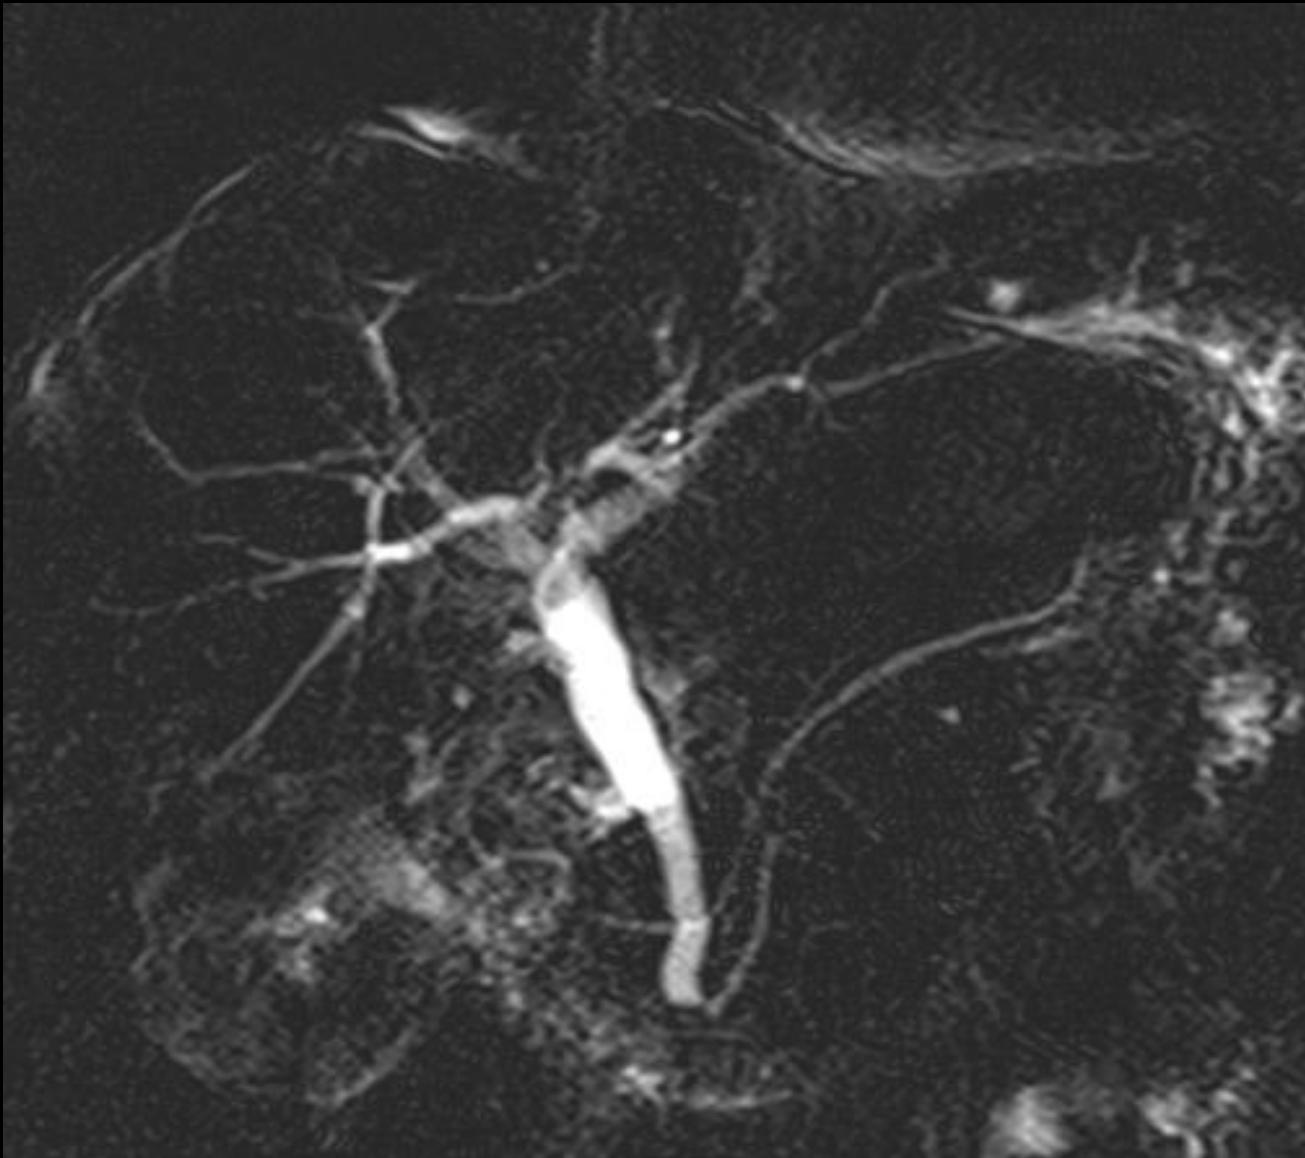

polysplenia syndrome or
polysplenia + situs ambiguous
(heterotaxy syndrome)
(polysplenia, midline liver, right
side stomach and left side IVC)

Q22.

82/female epigastric pain

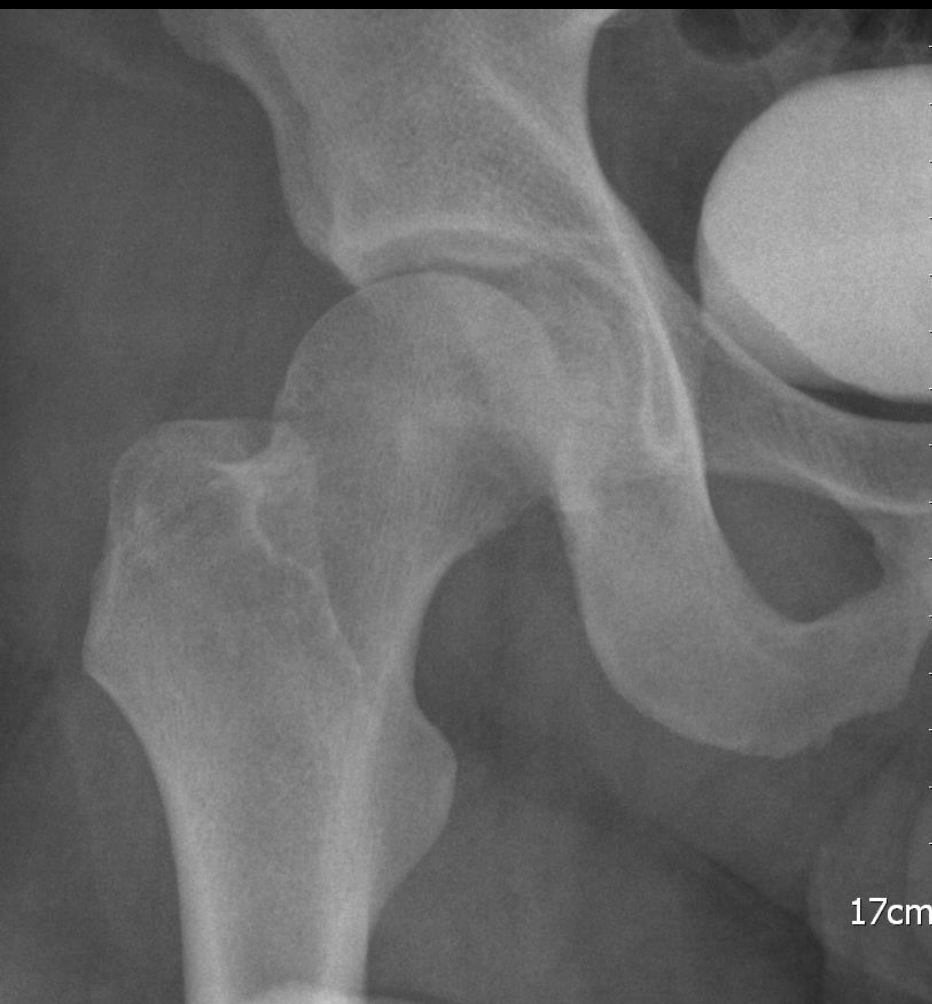

Pancreas divisum

14/male Left elbow pain after falling accident.

Avulsion fracture of medial
epicondyle
with intraarticular
entrapment

38/male Traffic accident in freeway.

Dashboard injury with
posterior dislocation of
knee and hip with
osteochondral fracture of
femoral head.

Q25.

Name 2 lesions. 41/male Left shoulder pain after falling down
In addition to rib fracture, please name other two lesions.

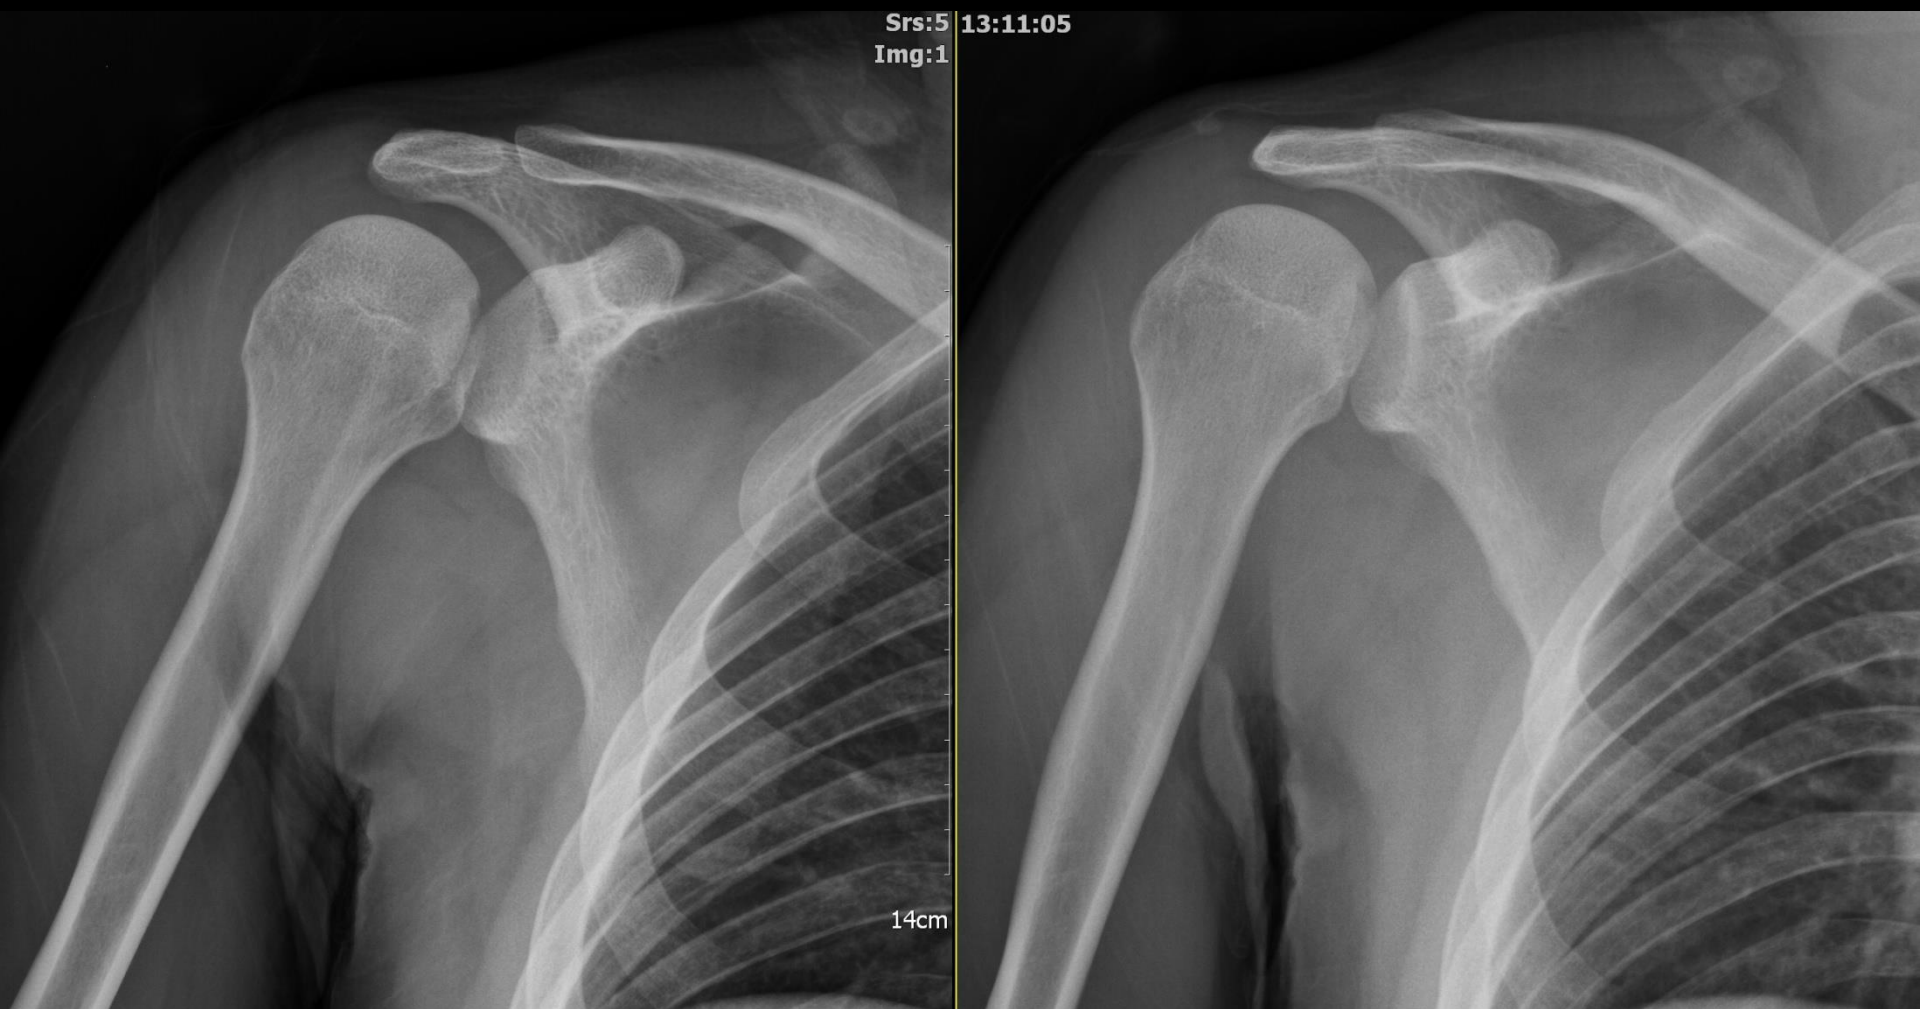

1. dislocation of AC joint
2. fracture of coracoid process

2/male elbow pain after falling down from chair

lateral condylar fracture

21/male shoulder pain after motorcycle accident

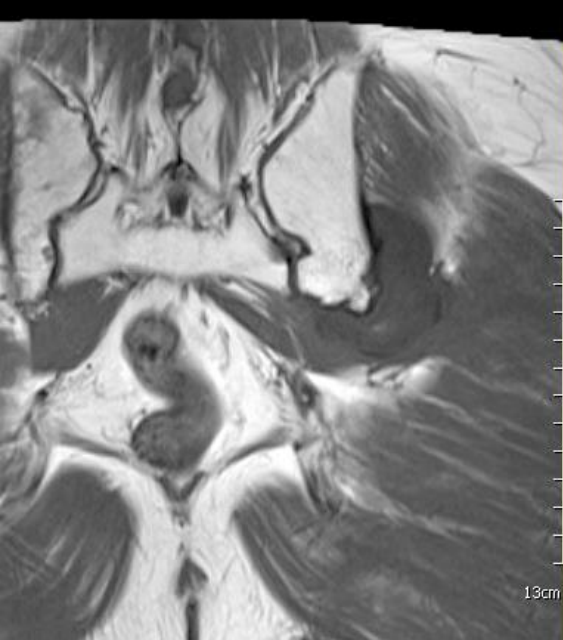

posterior dislocation of
glenohumeral joint

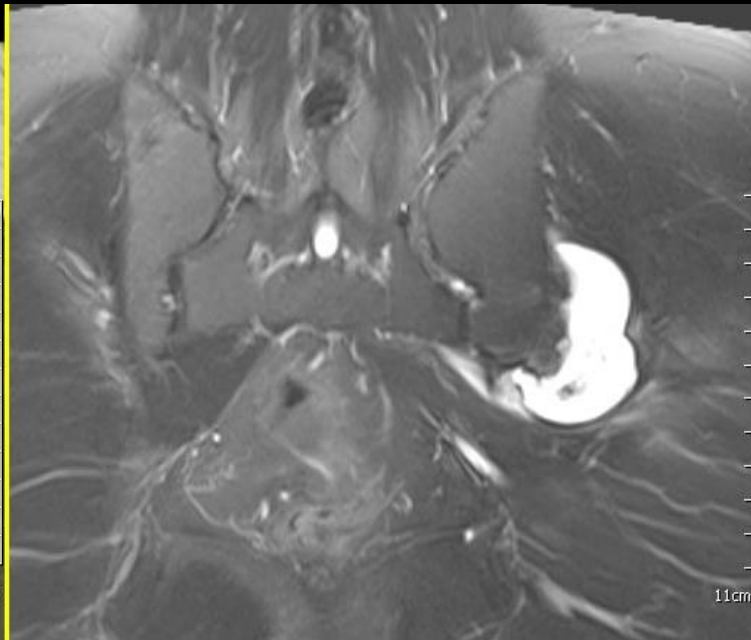

Q28. 55/male

Previous resection of pelvic mass, follow-up

T1+c FS

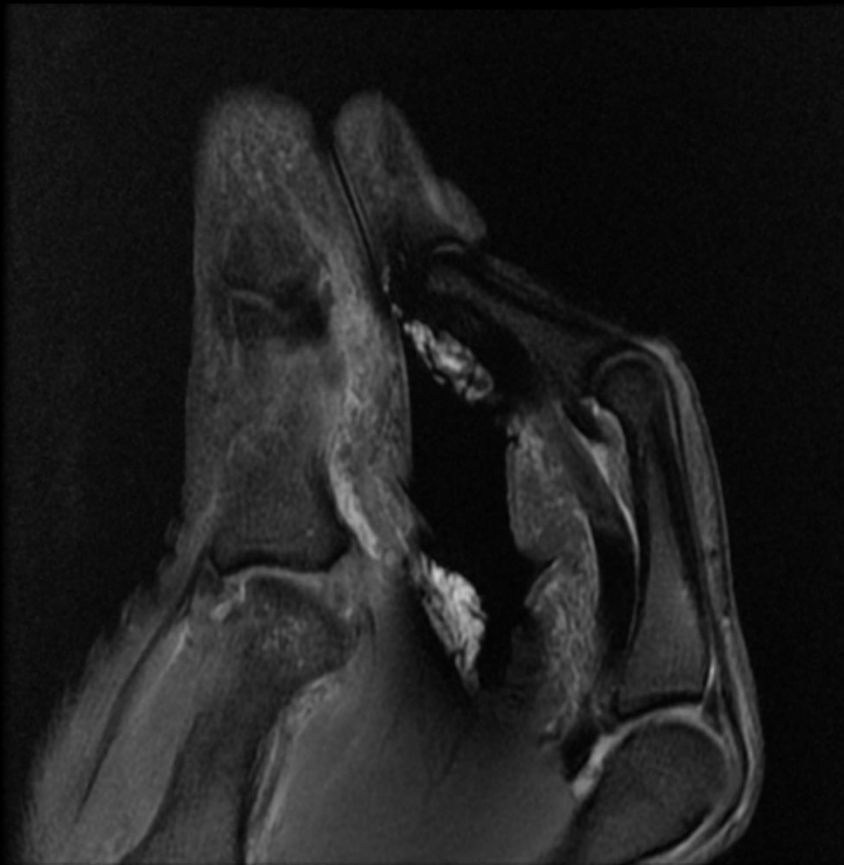

Left

Right

Recurrent chondrosarcoma
arising from osteochondroma
(malignant change) of left ilium

PDWI FS

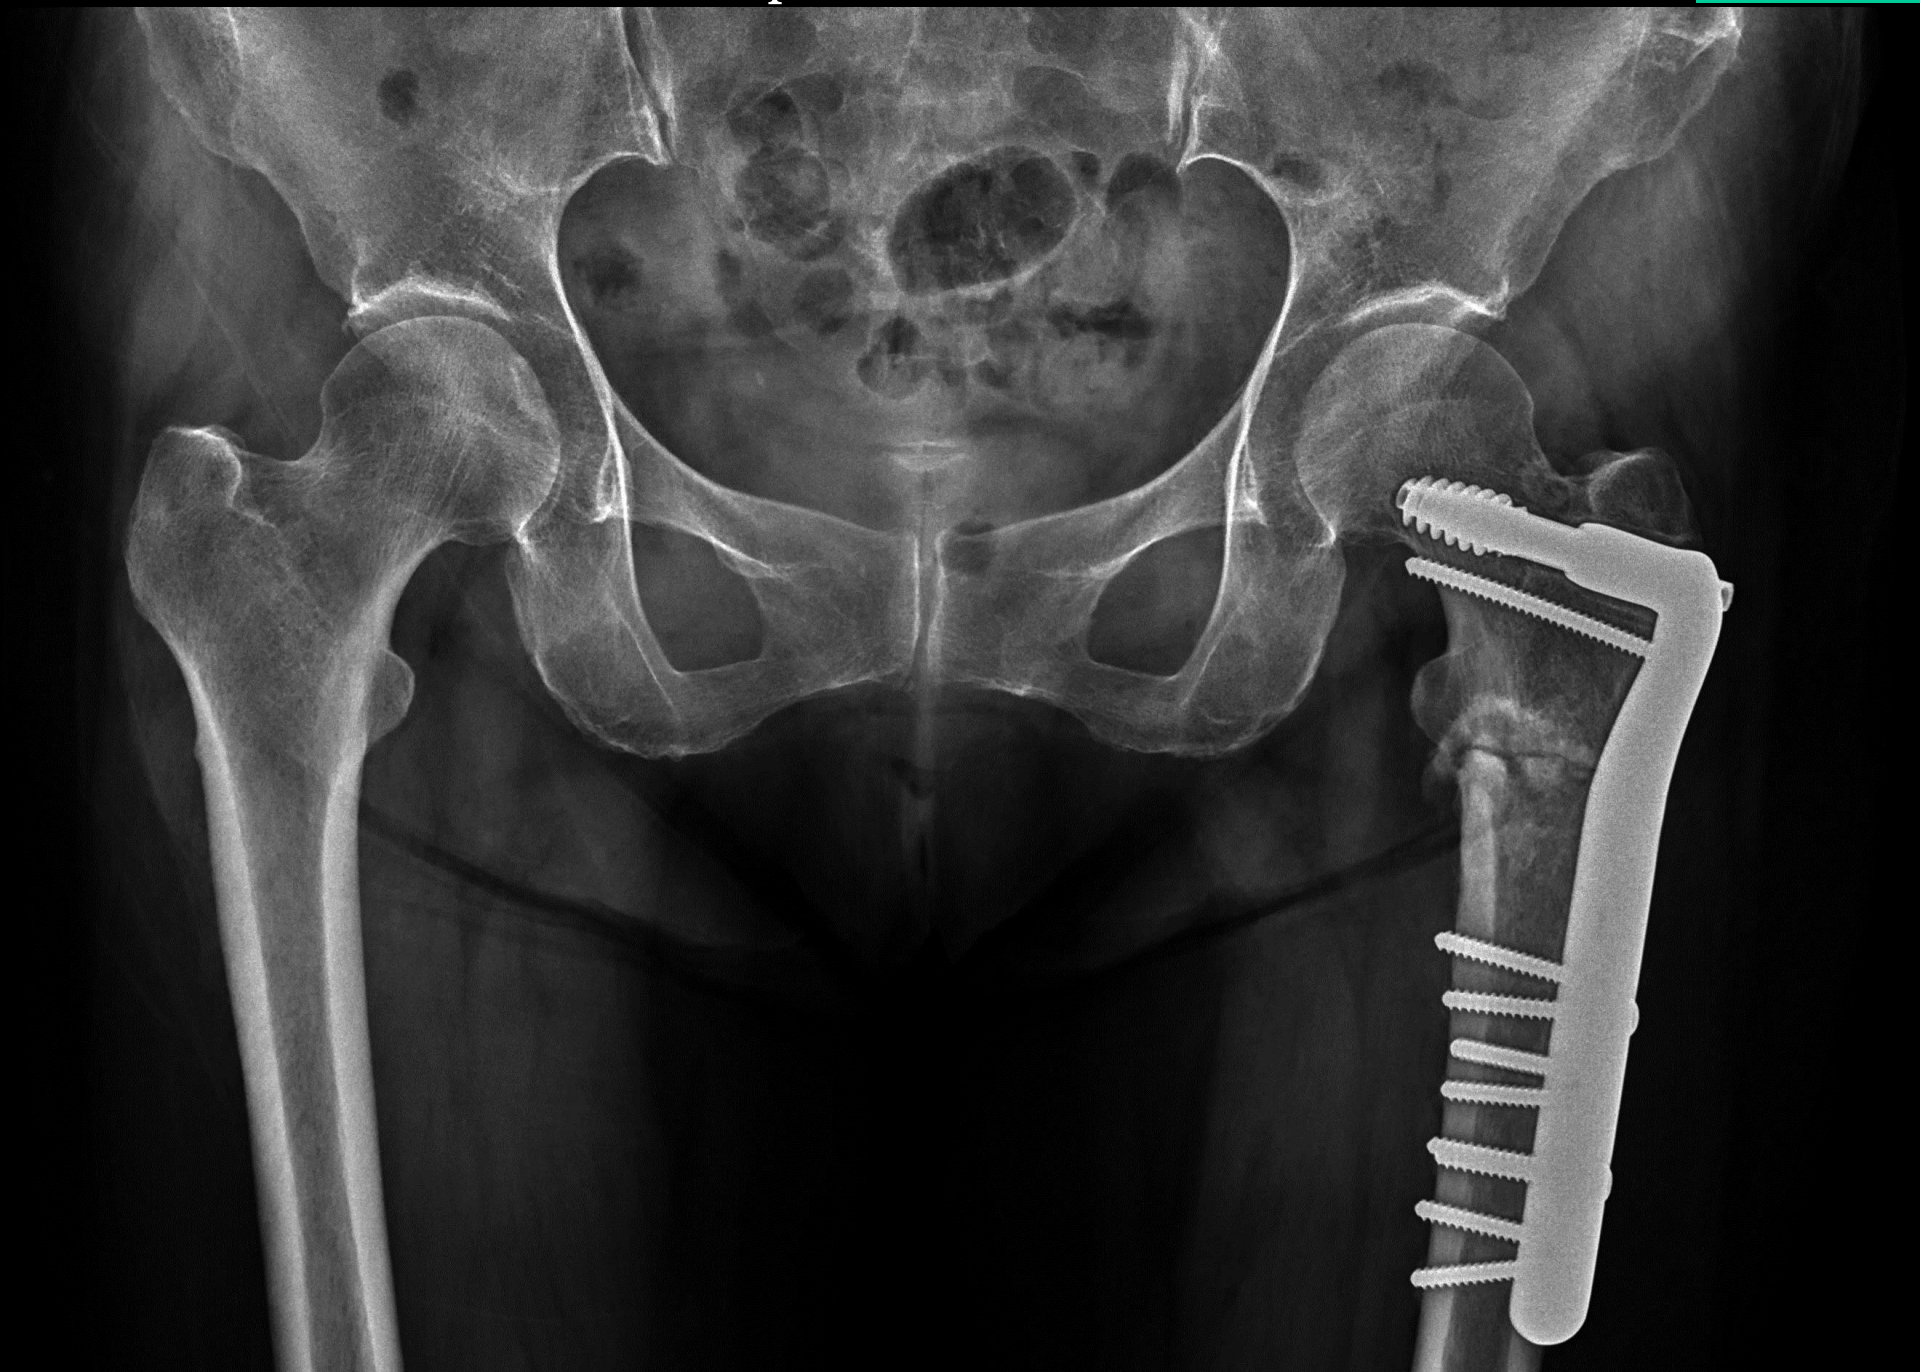

59/male

Posttraumatic painful swelling of right thumb

Gamekeeper thumb, ulnar
collateral ligament complete tear
with Stener lesion

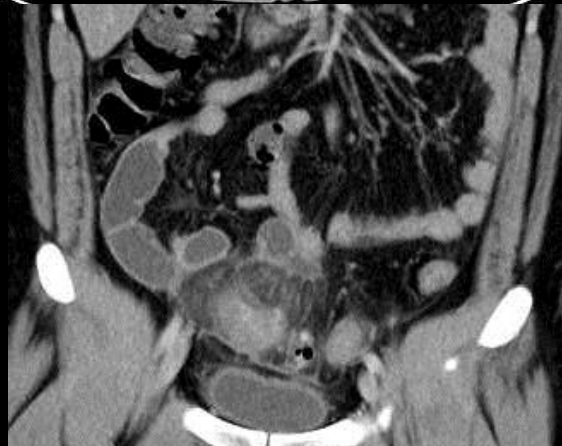

Bisphosphonate related atypical
subtrochanteric femoral fracture

28 y/o, male

Chief complaint:
Dysuria with gas
pass out during
voiding

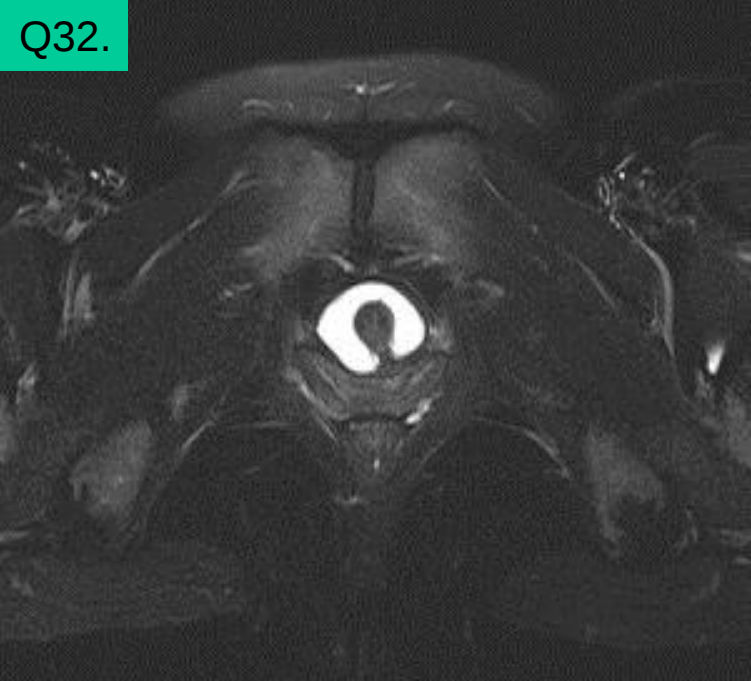

2011-3-31

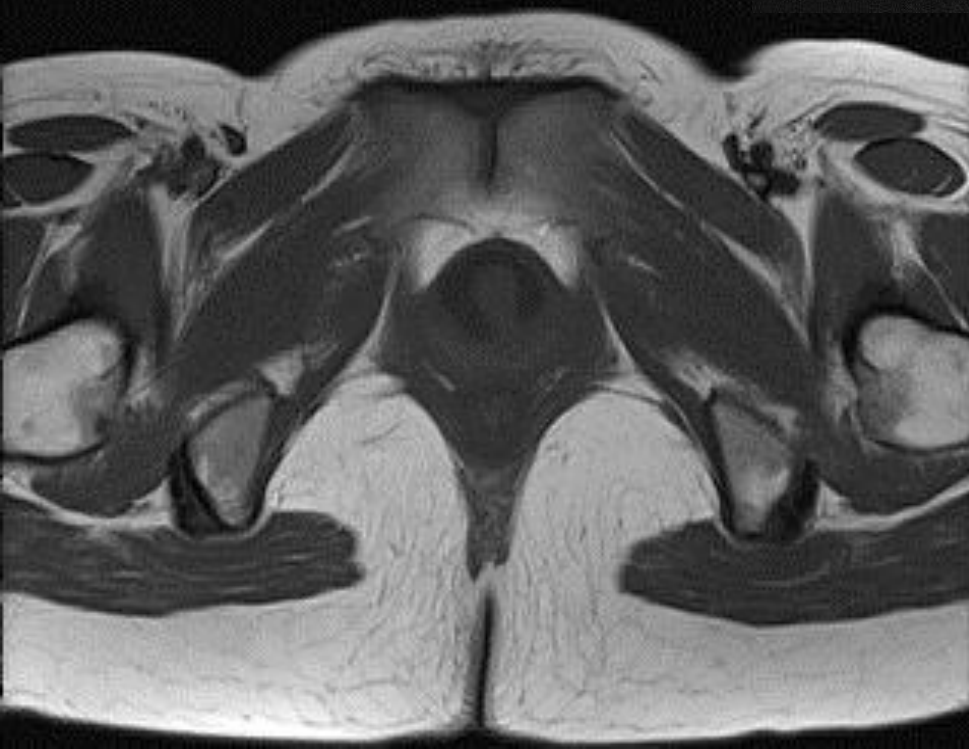

2013-12-4

Sigmoid diverticulitis with colo-
vesical fistula

Q32.

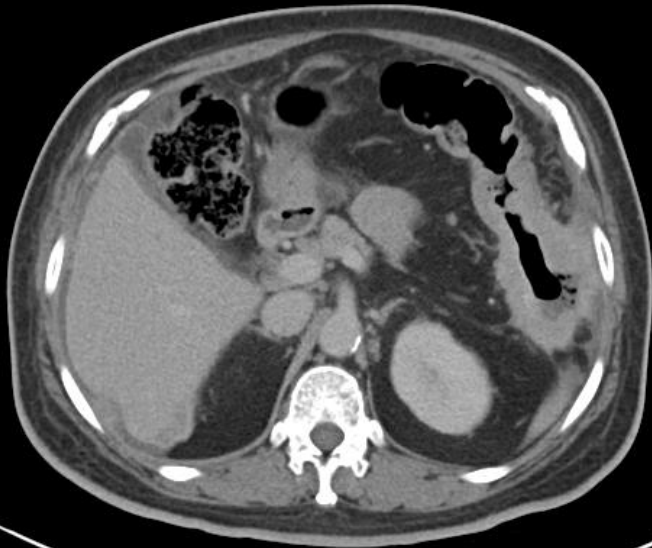

37 y/o female
Dysuria off and
on for 6 months

Urethral diverticulum

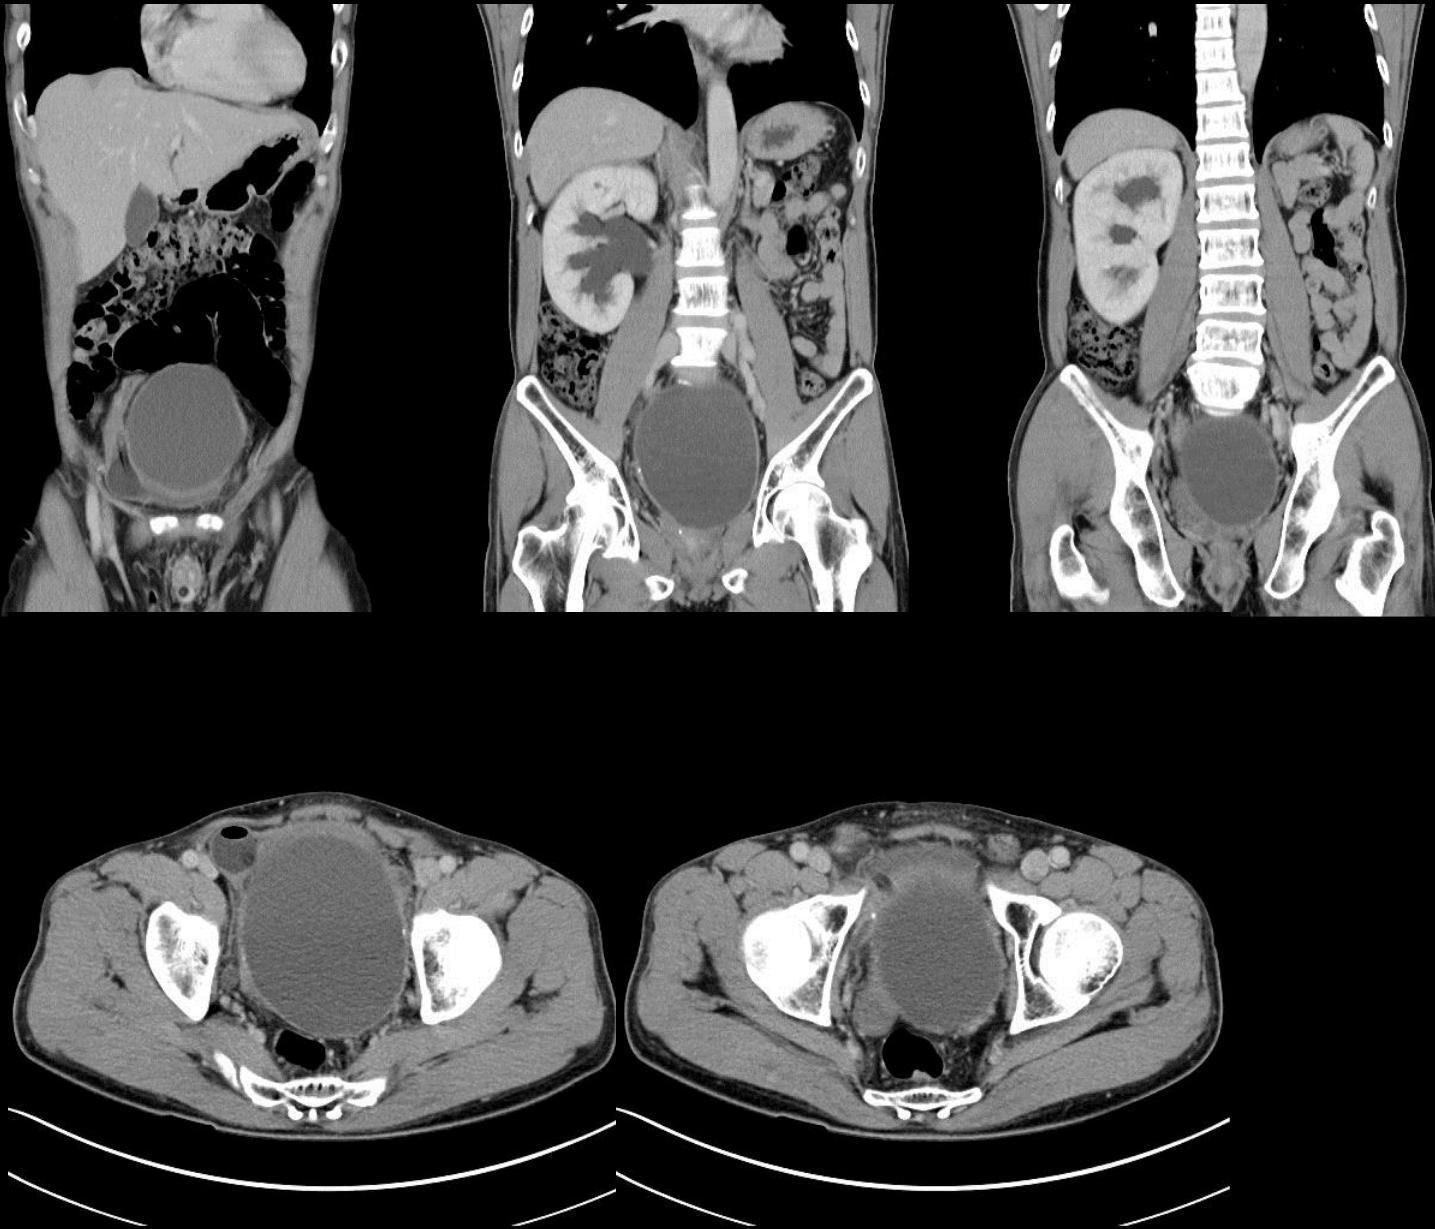

Q33.

56/female Abdominal distention and pain for 10 days

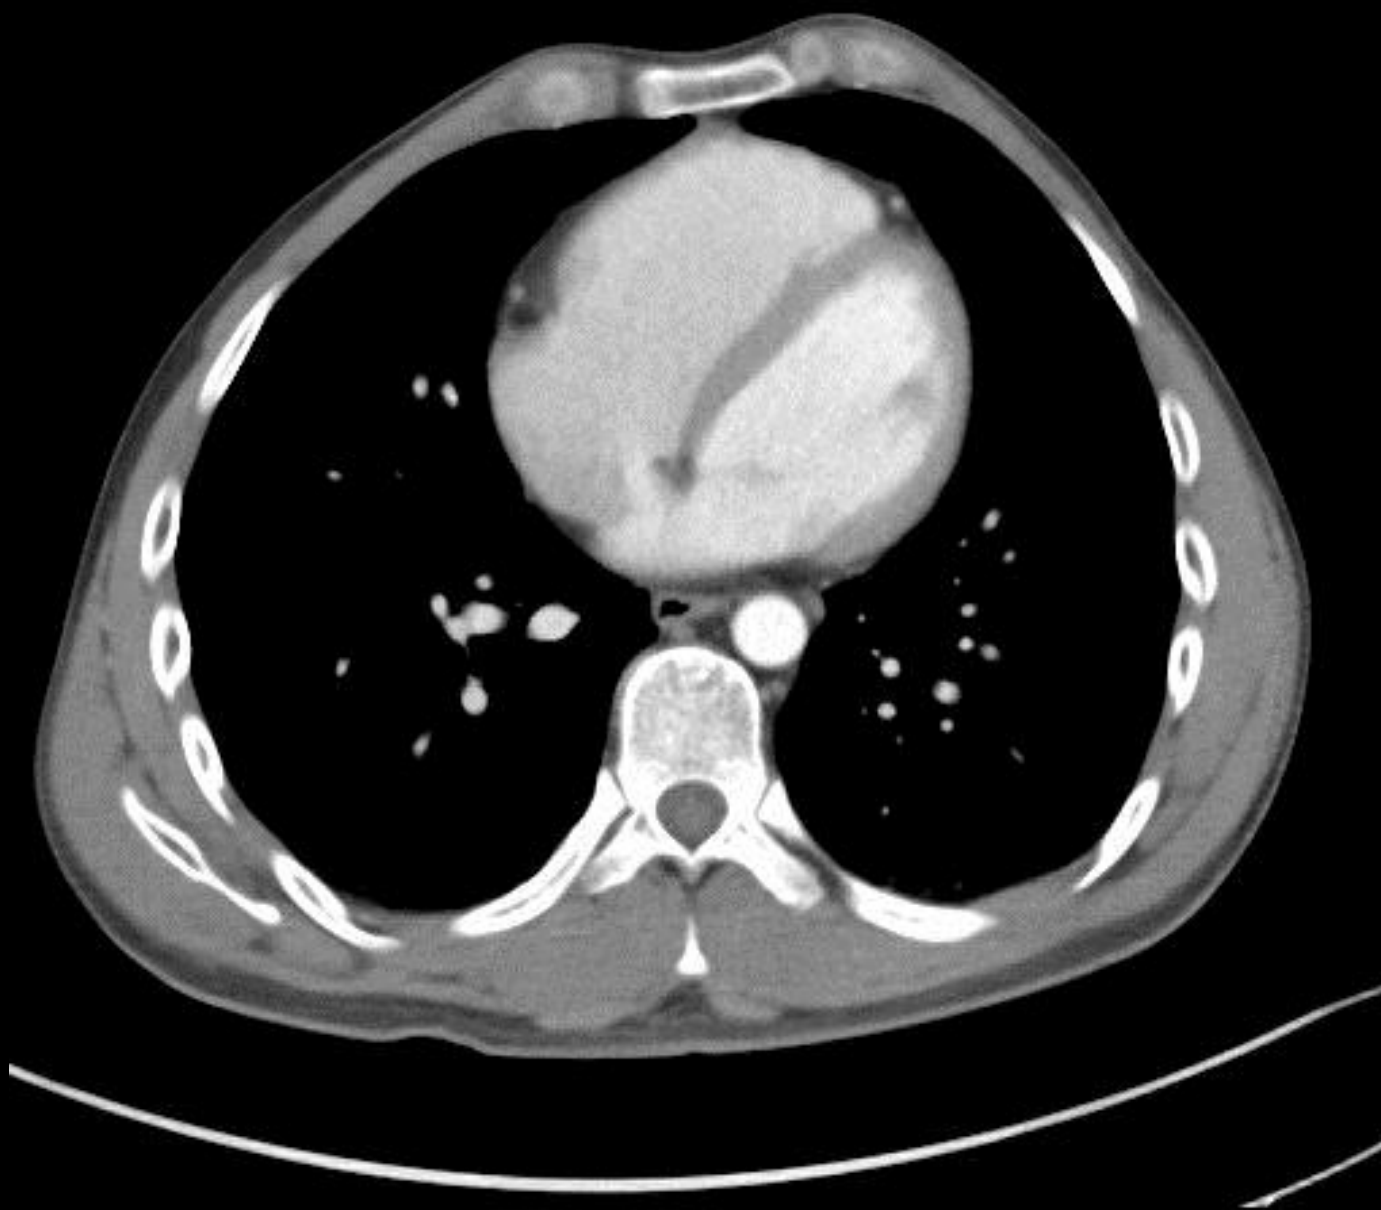

Krukenberg tumor (Colon carcinoma with bilateral ovarian metastasis)

45/Male Hematuria for 3 days. Urgency and frequency

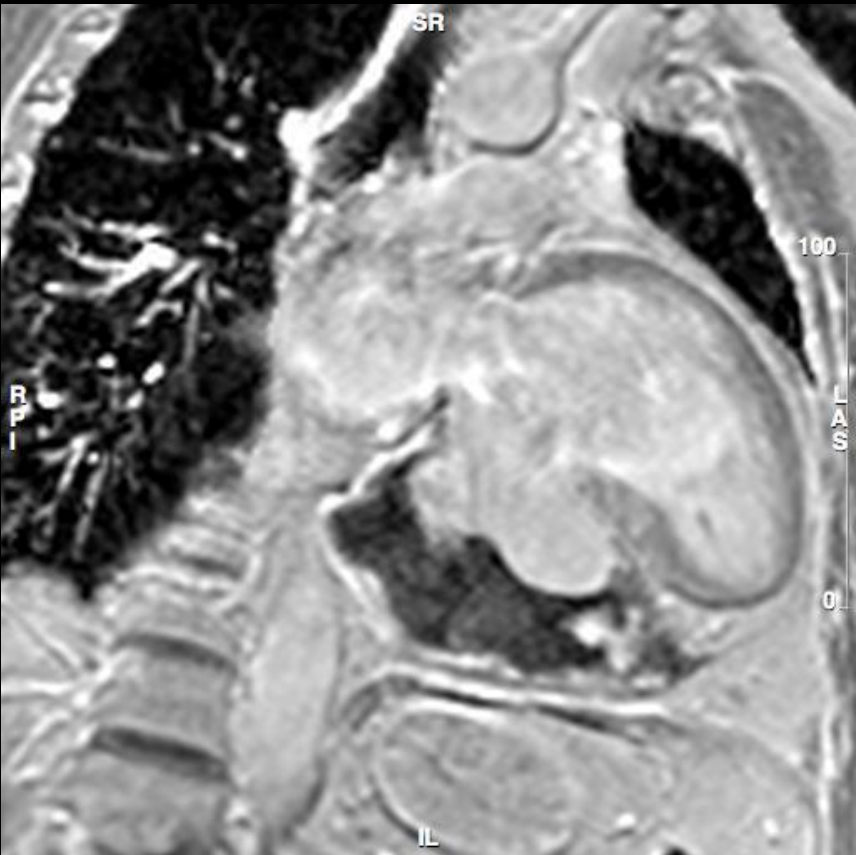

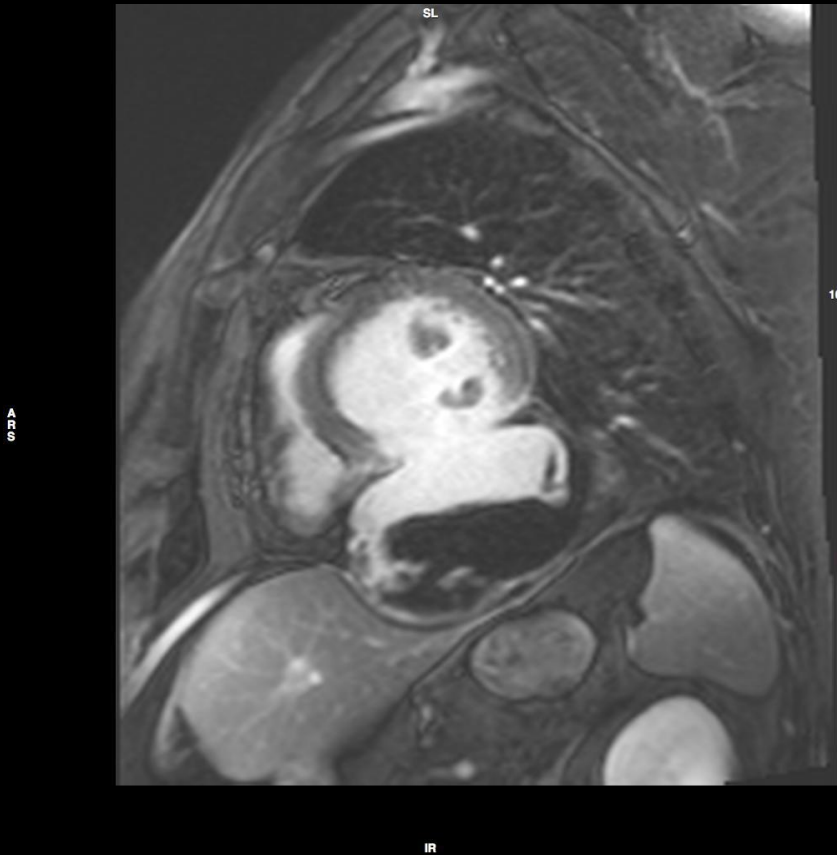

Left seminal vesicle cyst with
agenesis of Left kidney

Atrial septal defect (ASD)

40 y/o male, SOB

LV pseudoaneurysm

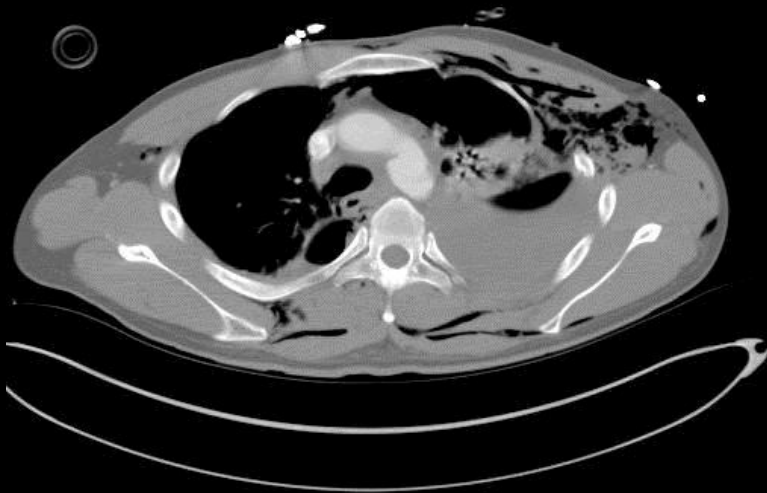

Q37.

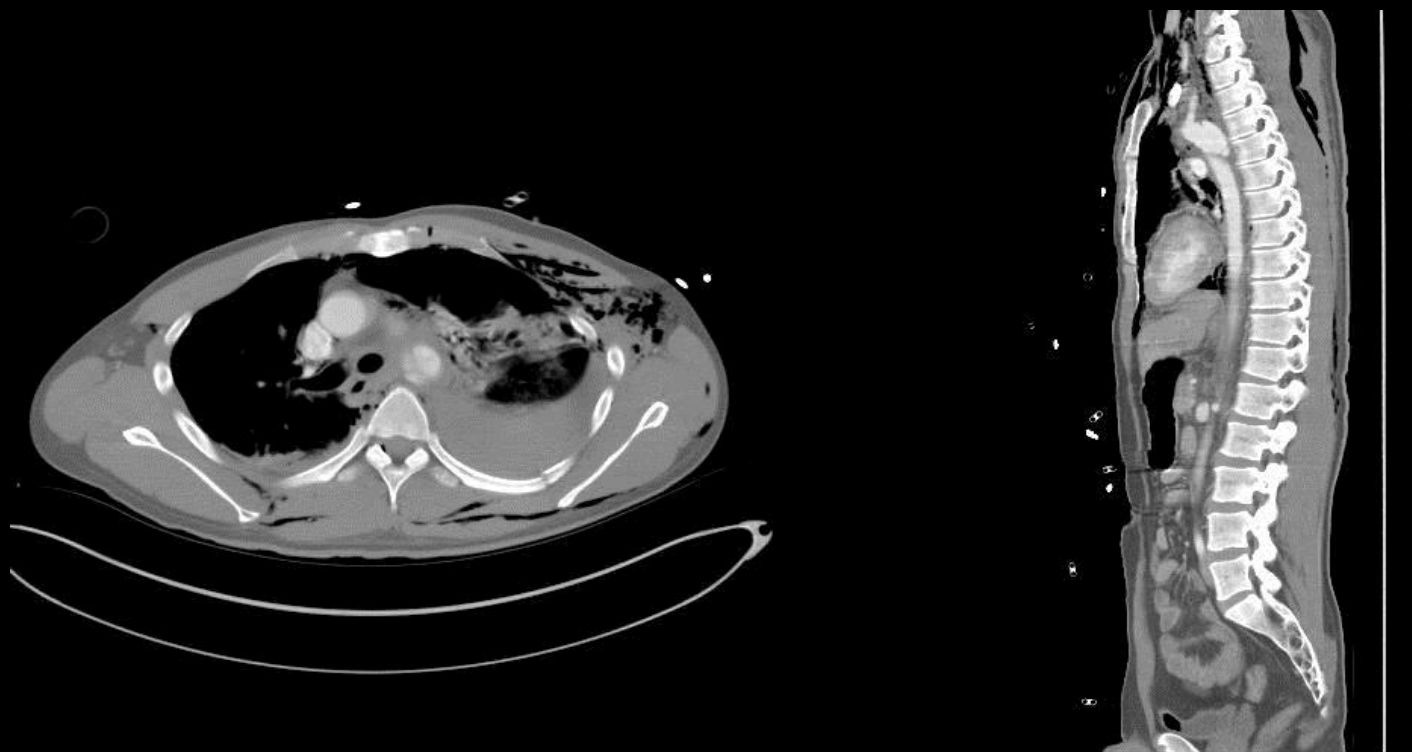

82/female Chronic right side heart failure and pulmonary hypertension.

Patent ductus arteriosus (PDA)

30 y/o traumatic patient:
what is the most lethal injury seen?

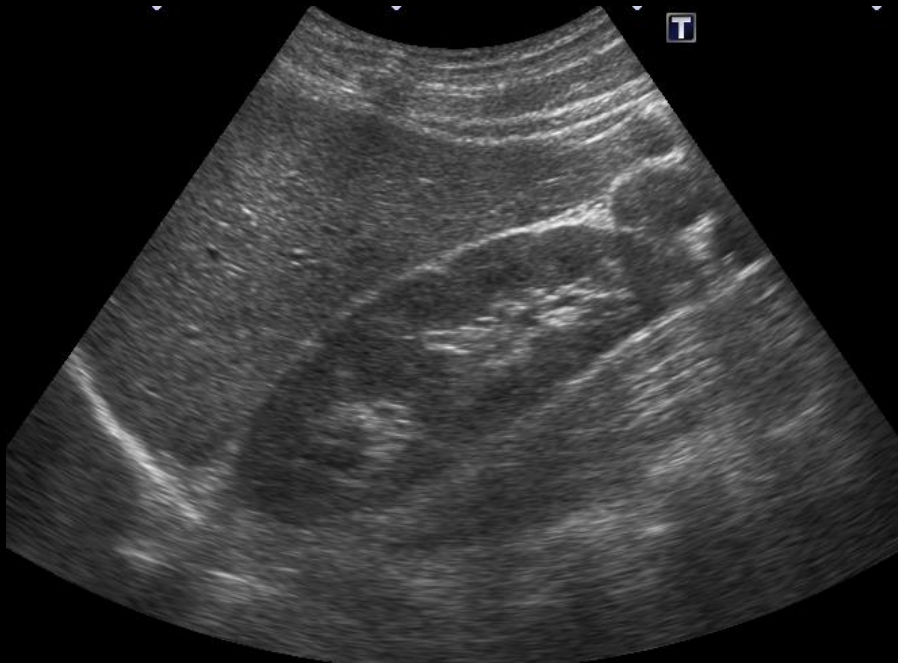

Aortic Laceration

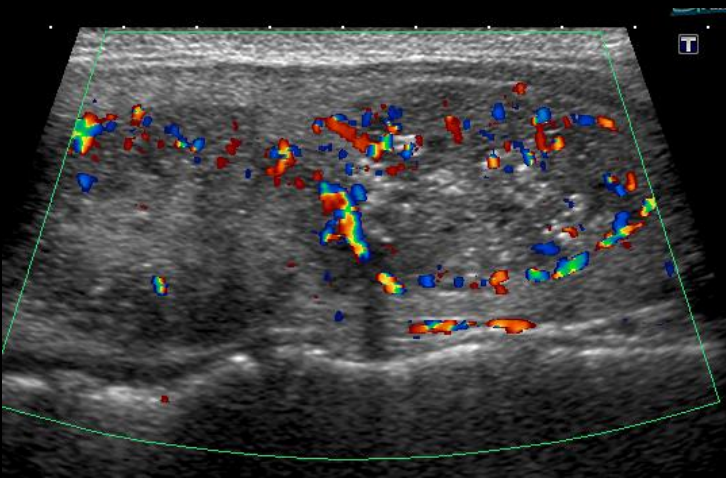

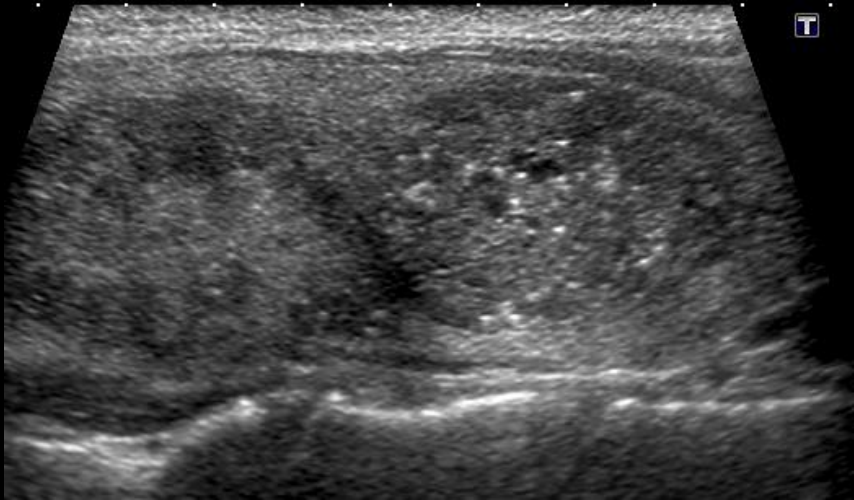

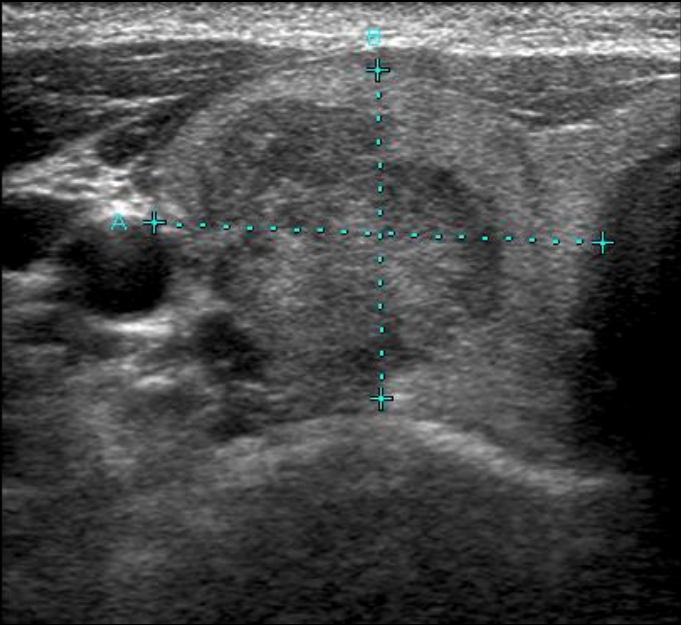

33/male

Health examination

Duplication of the pelvocalyceal
system with focal hydrocalyx of
the upper moiety

35/Female Neck mass referred from LMD

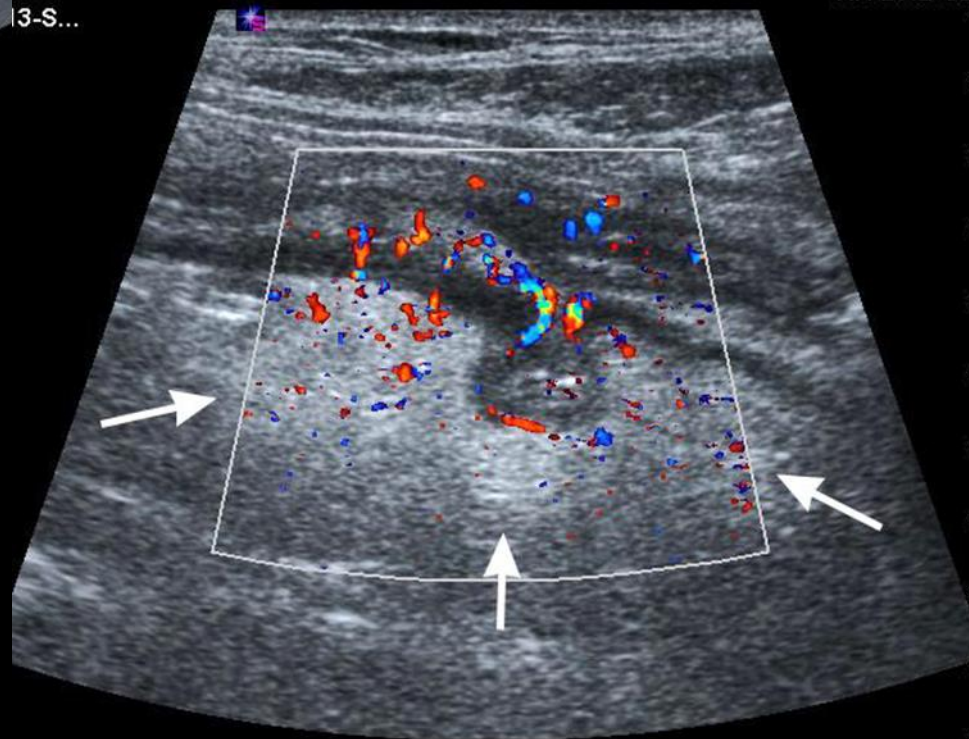

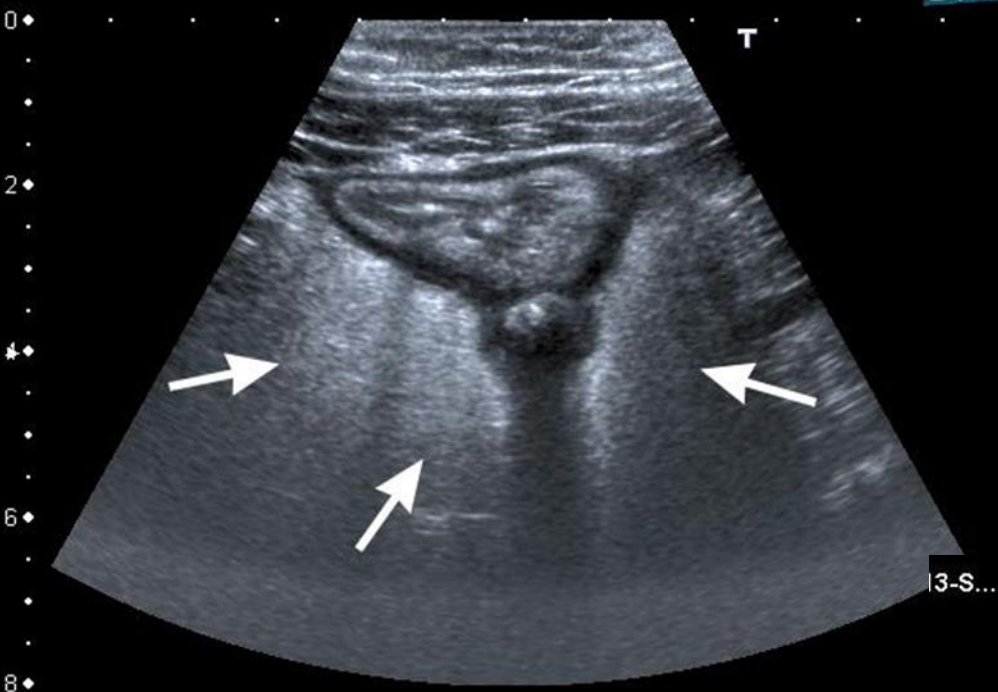

Papillary carcinoma of thyroid.

Q41.

QPure

51/Male

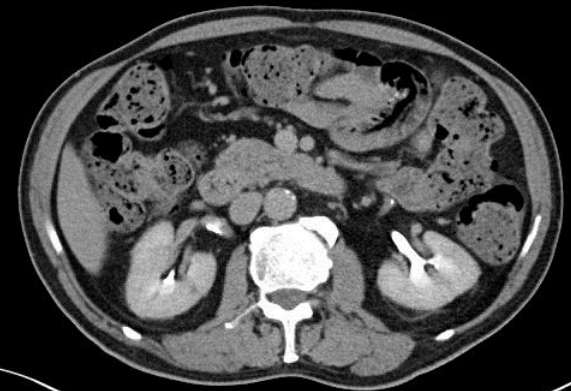

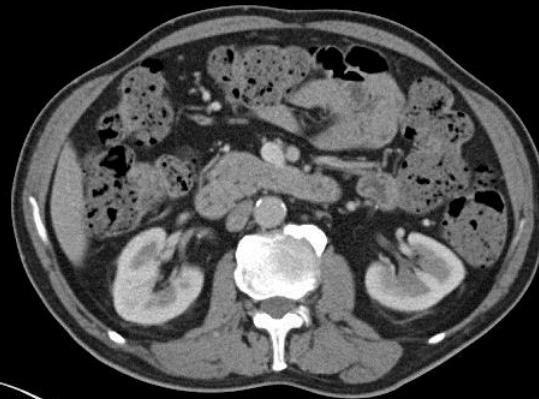

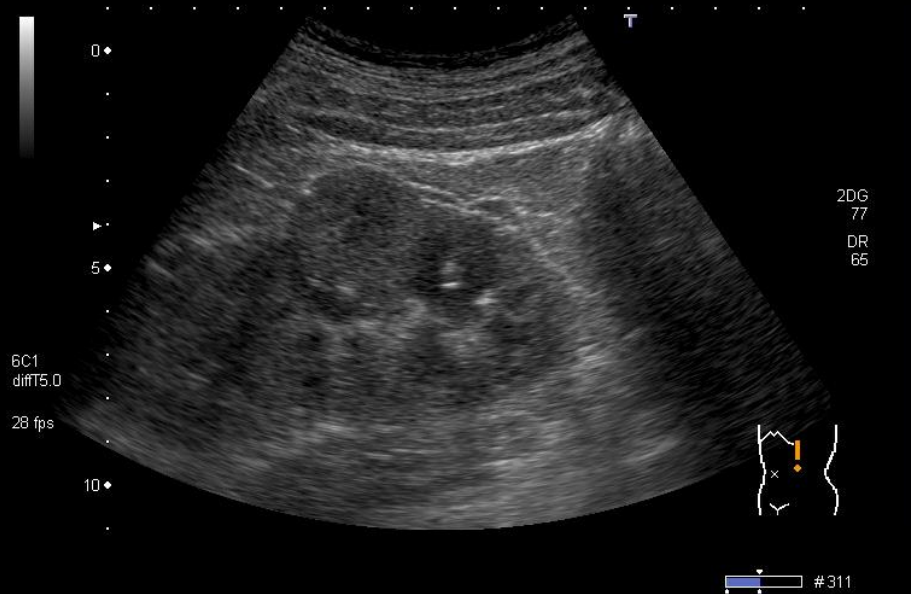

Left lower abdominal
pain for several hours.

Diverticulitis.

66/male

Dysuria for a long time

Fetal lobulation

2 months/Male Right groin mass for days.

Q45.

5/female hoarse voice with barking cough

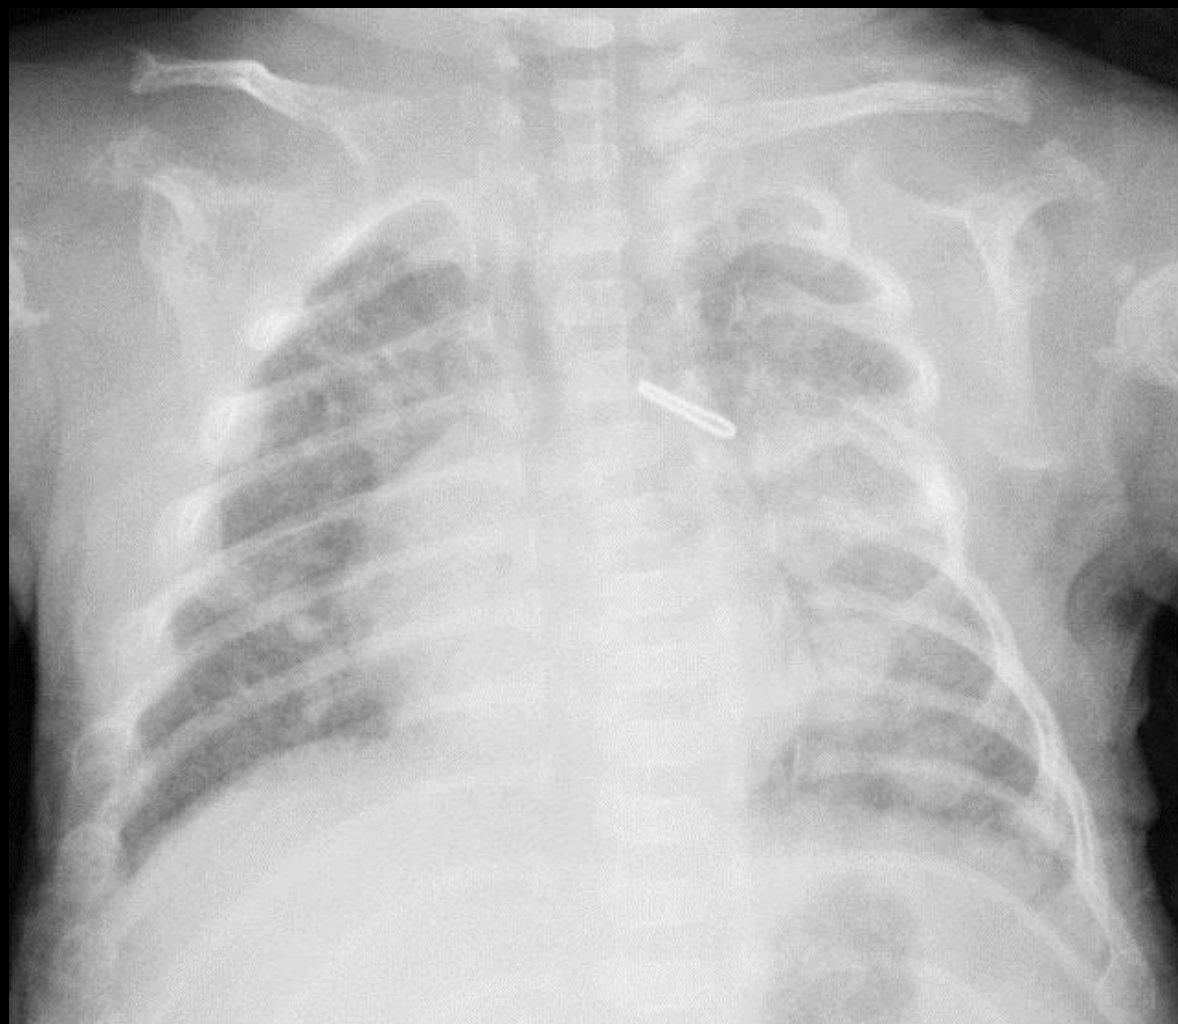

Croup

05/23, 3m/o
1. Prematurity
with NICU care
for 3 months
since birth.
2. Prolonged
TPN use.

05/23, 3m/o

Rickets

Q47.

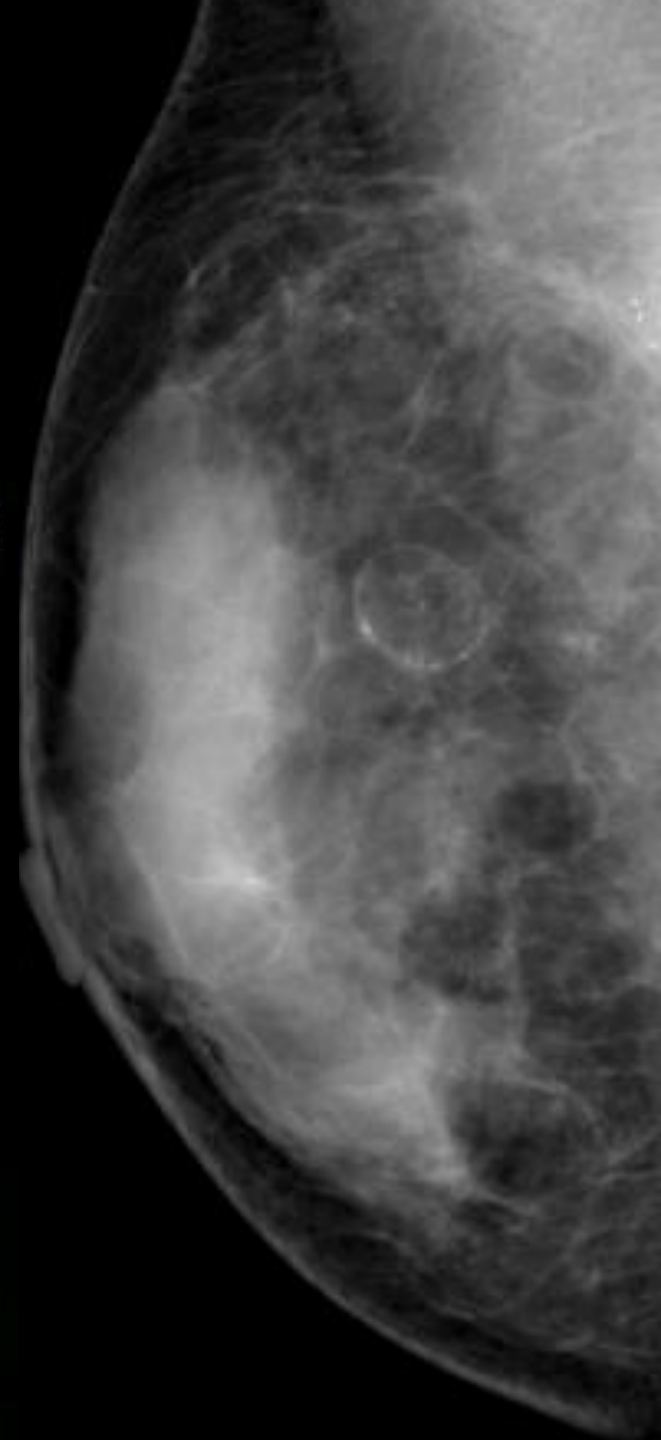

- Female 28 y/o,
- Palpable tubular structure in right breast for 2 weeks, mild tender
- Diagnosis?

Mondor Disease
or
Superficial thrombophlebitis of
breast

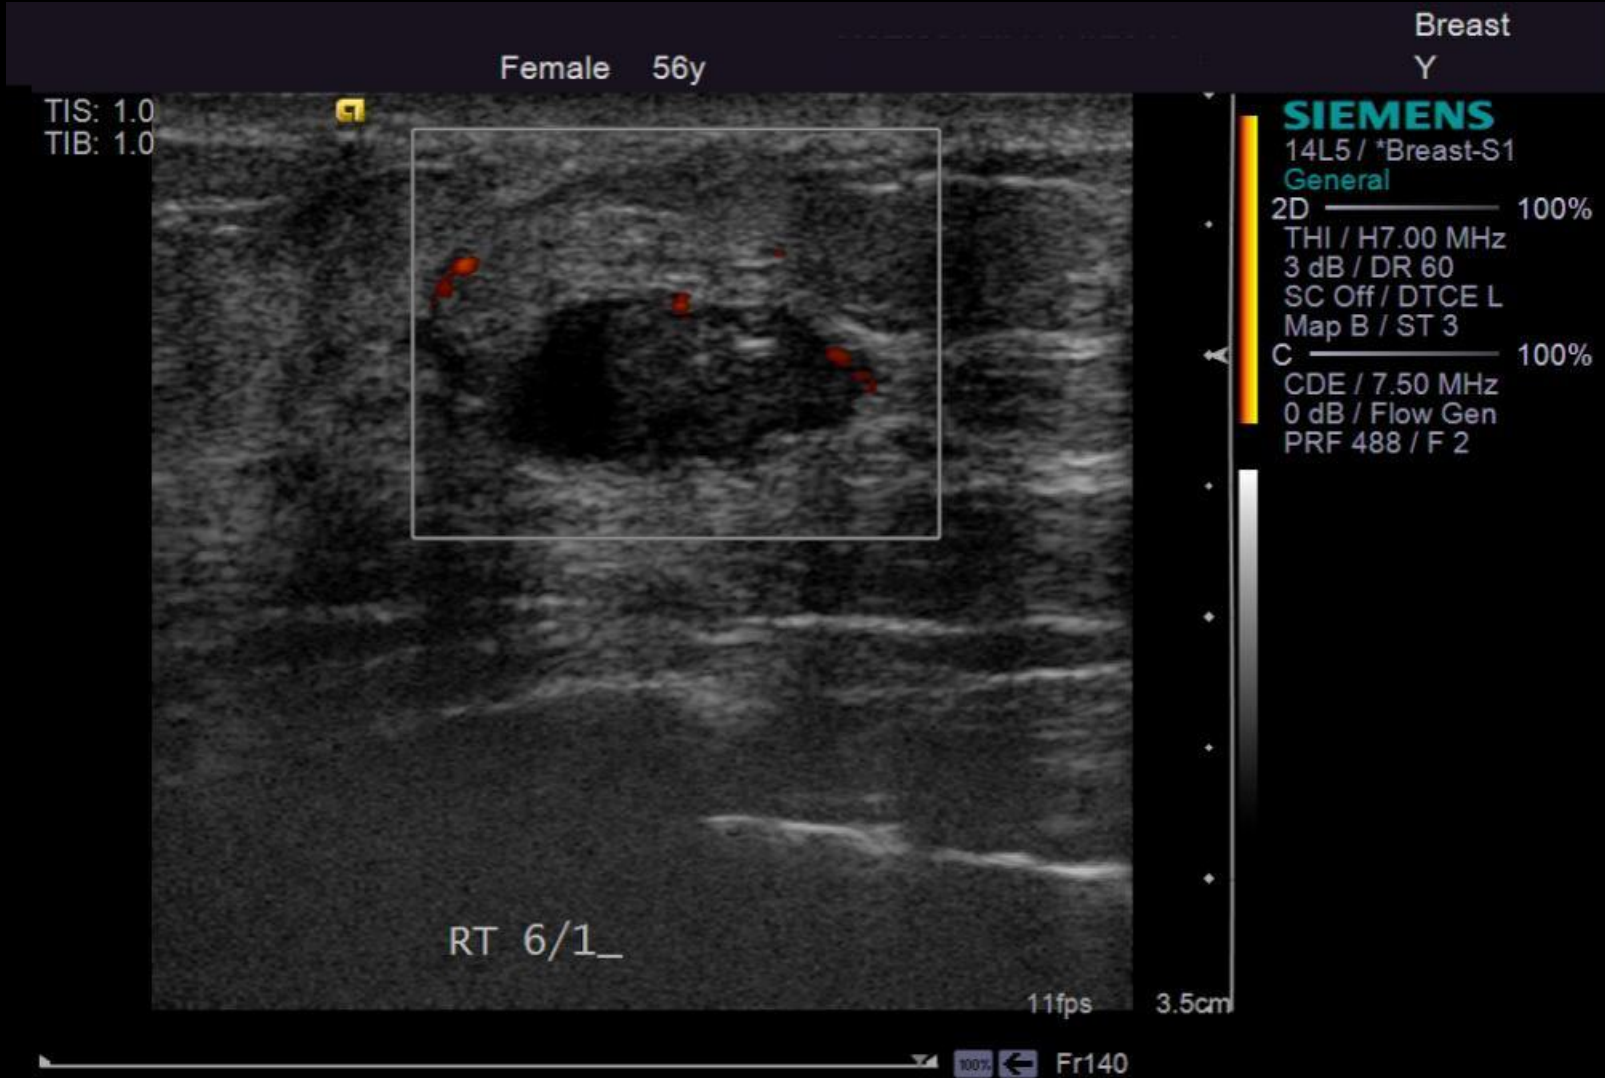

Q48.

- Female 45 y/o,
- No specific symptom/sign
- Diagnosis?

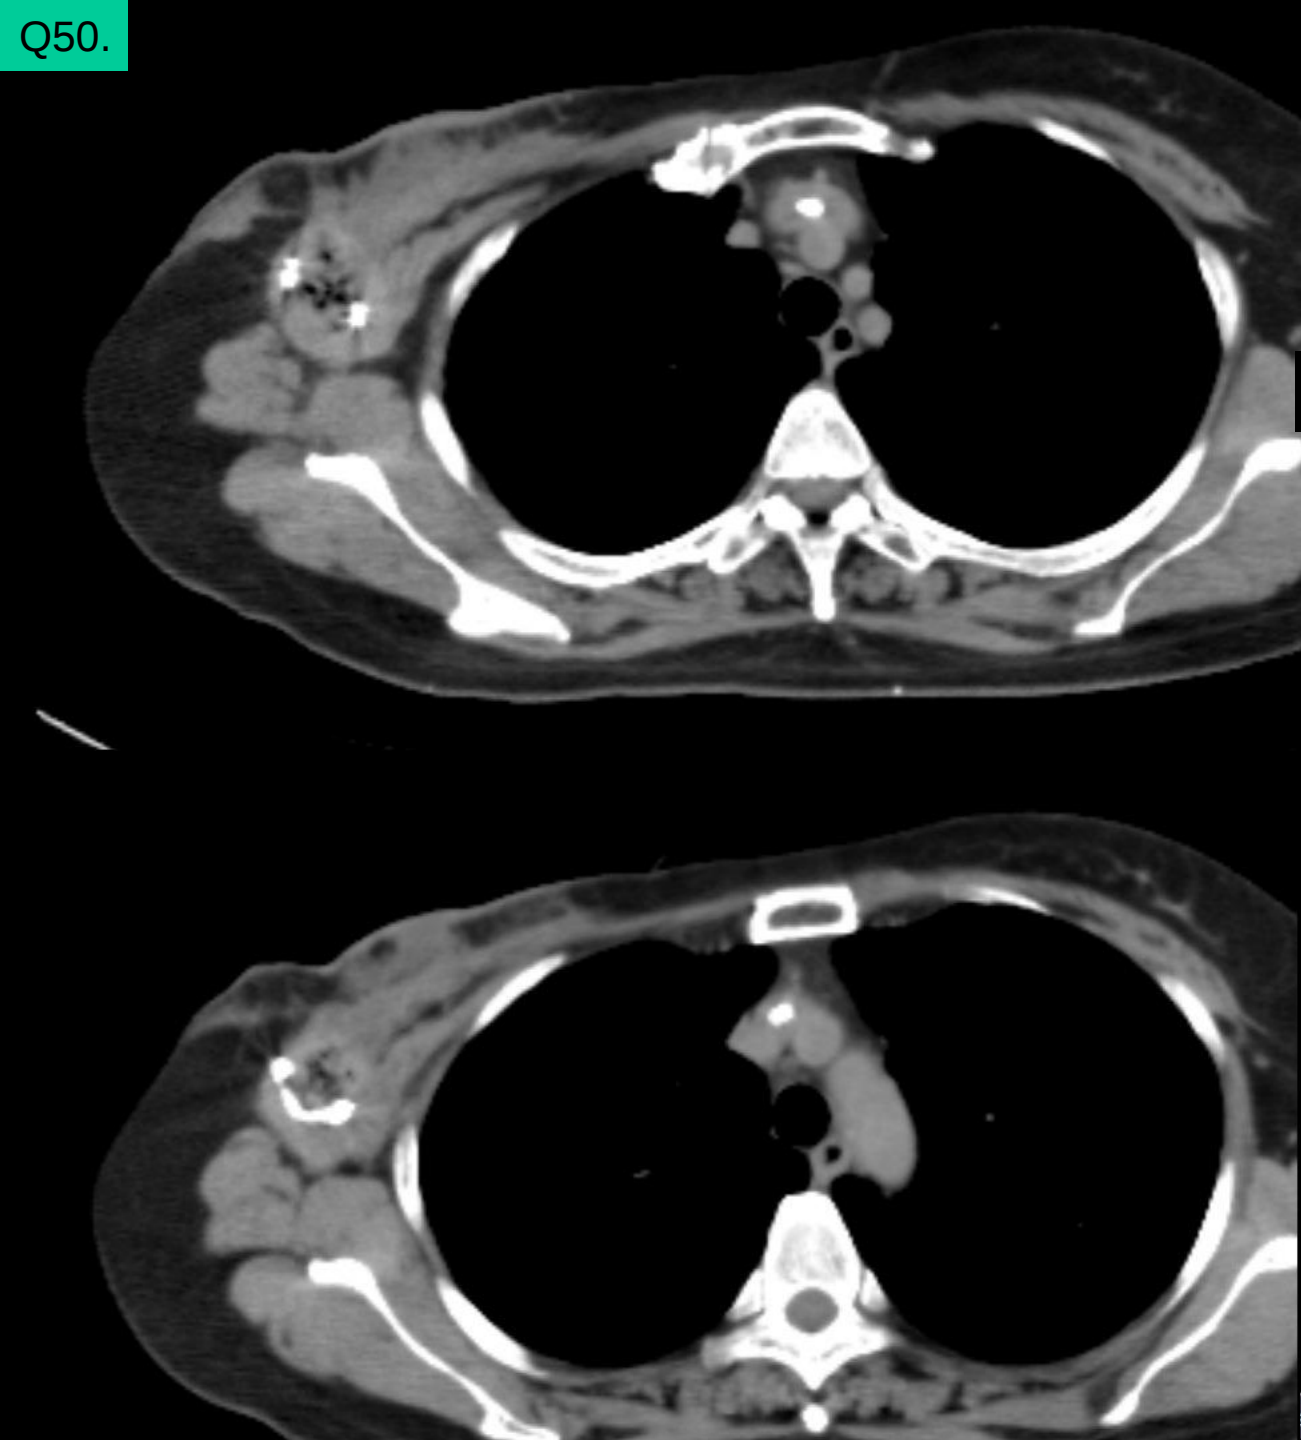

Fat necrosis
or
Fat necrotic cyst
or
Oil cyst

56 y/o female, incidental finding at
Rt 6/1 breast. Your diagnosis?

Papilloma

另外, Intracystic papilloma,
papillary tumor, papillary lesion,
papillary carcinoma 皆可

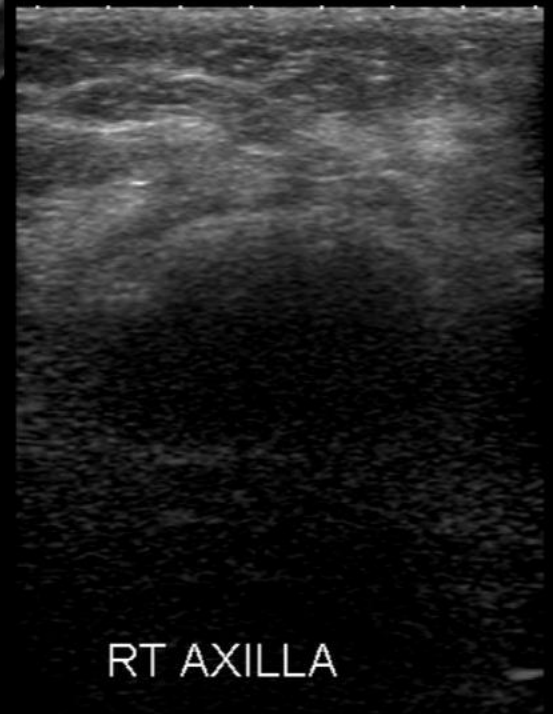

Female, 51 years old.

Right breast cancer (IDC), S/P MRM.

2 months post operation,
persistent right axillary lump.

What's your diagnosis?

NG ZHU 51 F
10A - C - Breast 3

Gossypiboma or Gauzoma
