

Medication Use Instruction Sheet

Instructions for Use of Rectal Suppository

■ Instructions for use

1. Clean both hands thoroughly with soap and water.
2. Open the outer packaging of the suppository; rapidly place the suppository into warm water for moisturizing.
3. Lie down, expose your back, straighten your lower leg, bent you upper leg towards your stomach. Use one hand to lift the upper buttock to expose the anus.
4. Use your finger to insert and push the suppository from the anus into the rectum for about 5cm deep.
5. Hold your lying position for 15 minutes.
6. If the suppository becomes soft and could not be inserted, place the suppository in the freezer for 30 minutes or remove the external packaging and placed it into cold water for it to harden.
