

Medication Use Instruction Sheet

Instructions for Use of Vaginal Cream

■ Instructions for use

1. Clean both hands thoroughly with soap and water.
2. Open tube cover; screw the applicator on to the cream tubing.
3. After screw lock the applicator, squeeze the cream tubing and fill the applicator the amount of cream required.
4. Unscrew and remove the applicator from tube.
5. Lie on your back with your knees drawn up; gently insert the applicator into your vagina at a depth possible for smooth insertion. Gently push the plunger of the applicator for cream delivery into the vaginal, and then remove the applicator from the vaginal.
6. Close the tube for storage.
7. Rinse and clean the applicator separately with a small amount of soap and warm water.

This sheet does not contain complete drug information, if there is any enquiry, please contact your doctor or pharmacist.

■ Precautions

1. Unless directed by physician, please do not use in pregnant or breastfeeding women.
2. If disease condition worsens or there is itchy, irritating sensation after using the vaginal cream, immediately seek for treatment.
3. It is best to use at bedtime so there is less leakage of the cream.
4. Vagina cream should be avoided from moisture, store at cool and shady area not reachable by children.
